

DINOZAURI

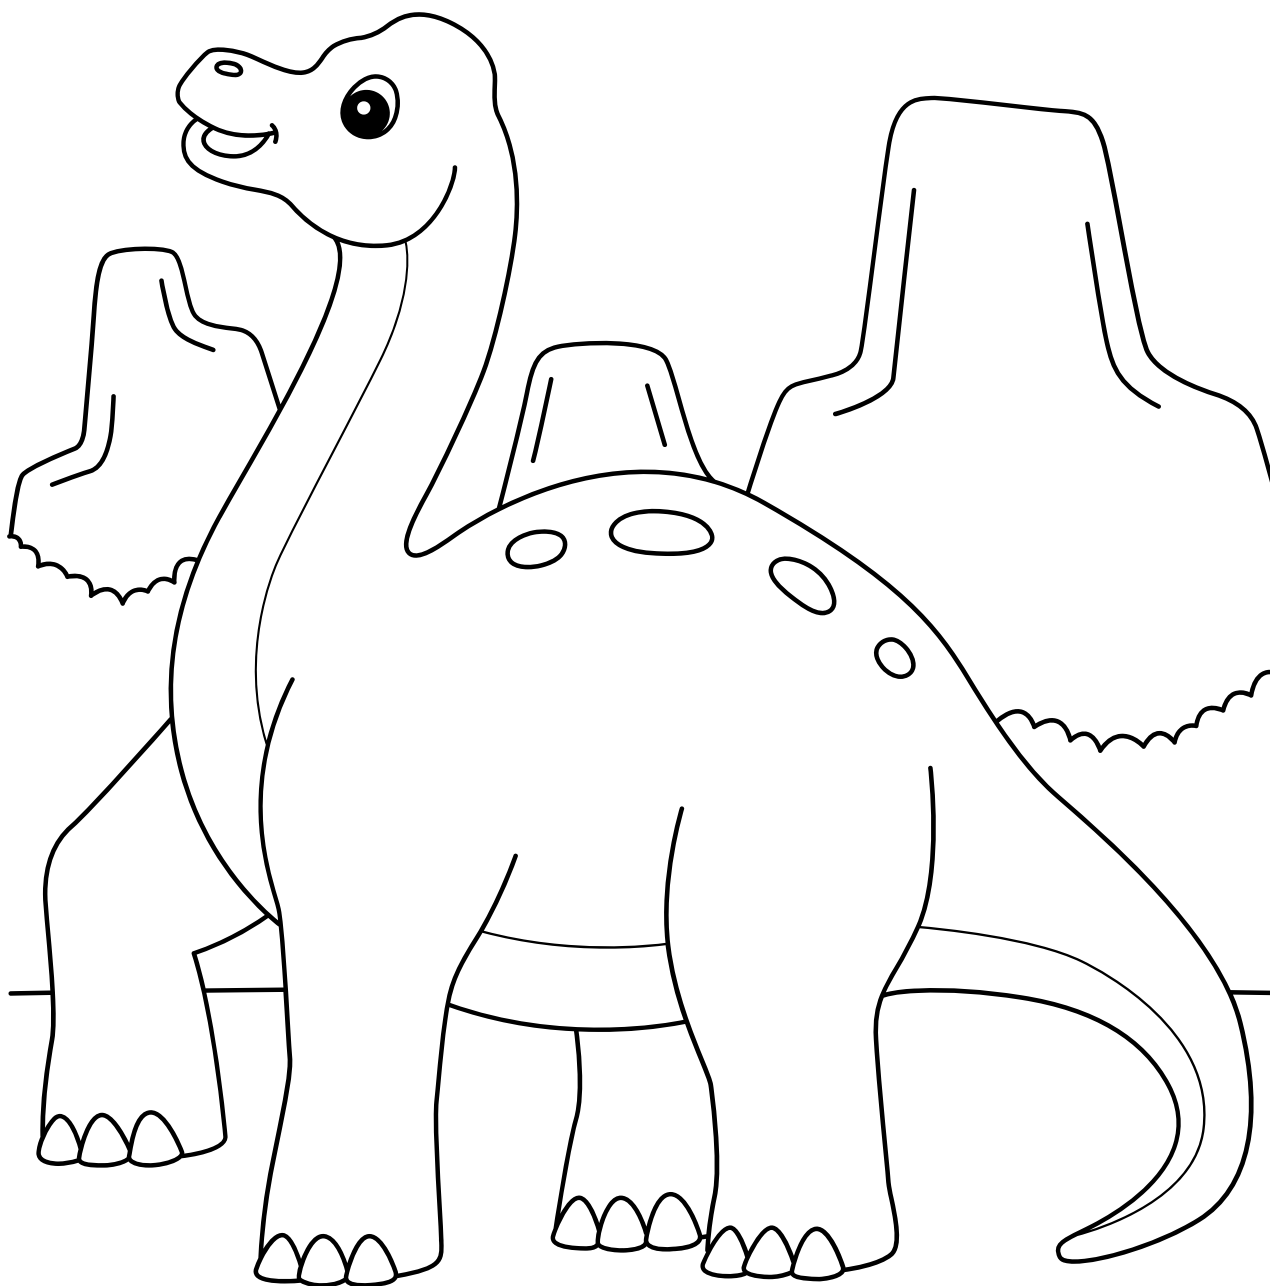

Carte de colorat

Gigantozaur

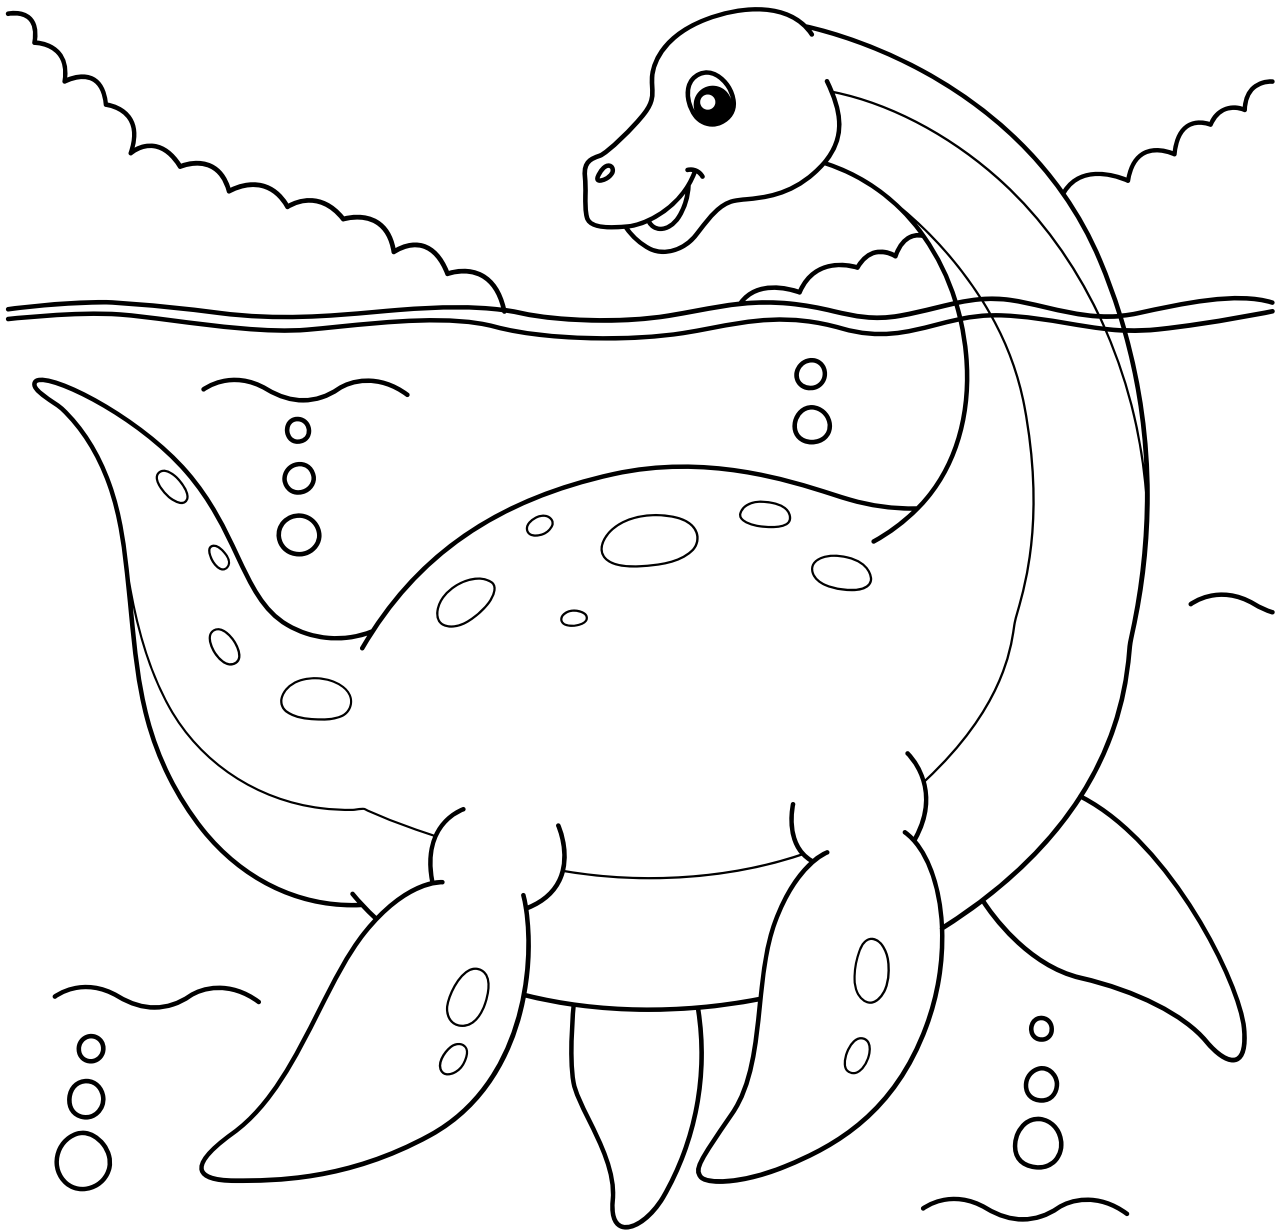

**Capul unui Gigantozaur avea
aproape 2 metri**

Brahiozaur

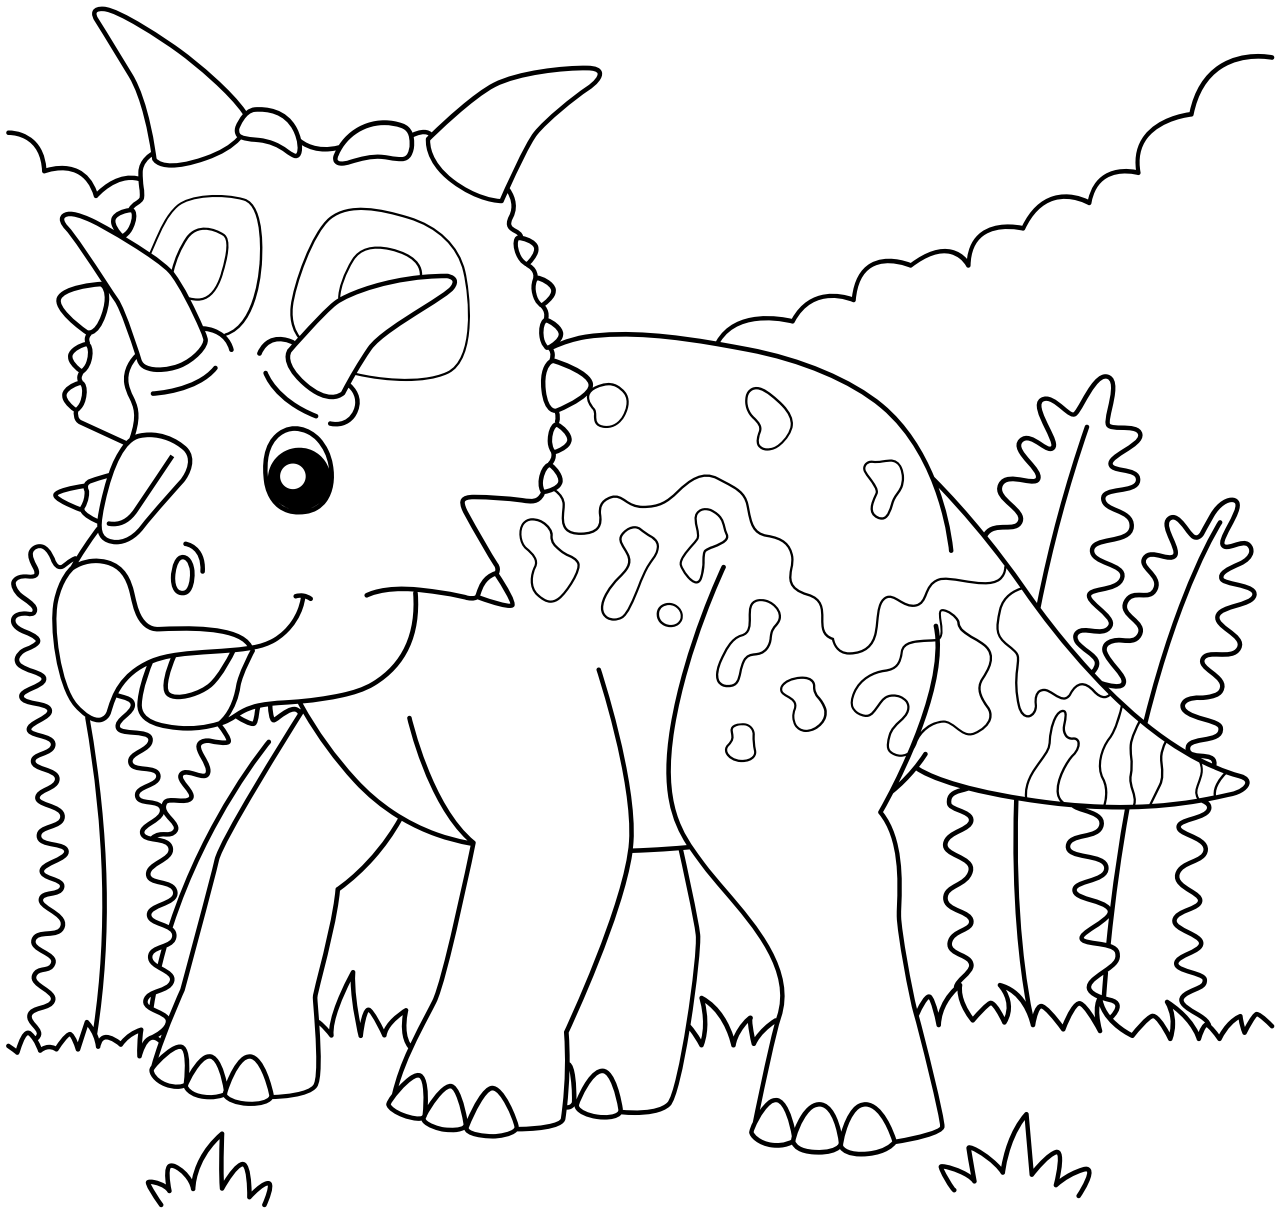

**Brahiozaurii au trăit acum
150 milioane de ani.**

Plesiozaur

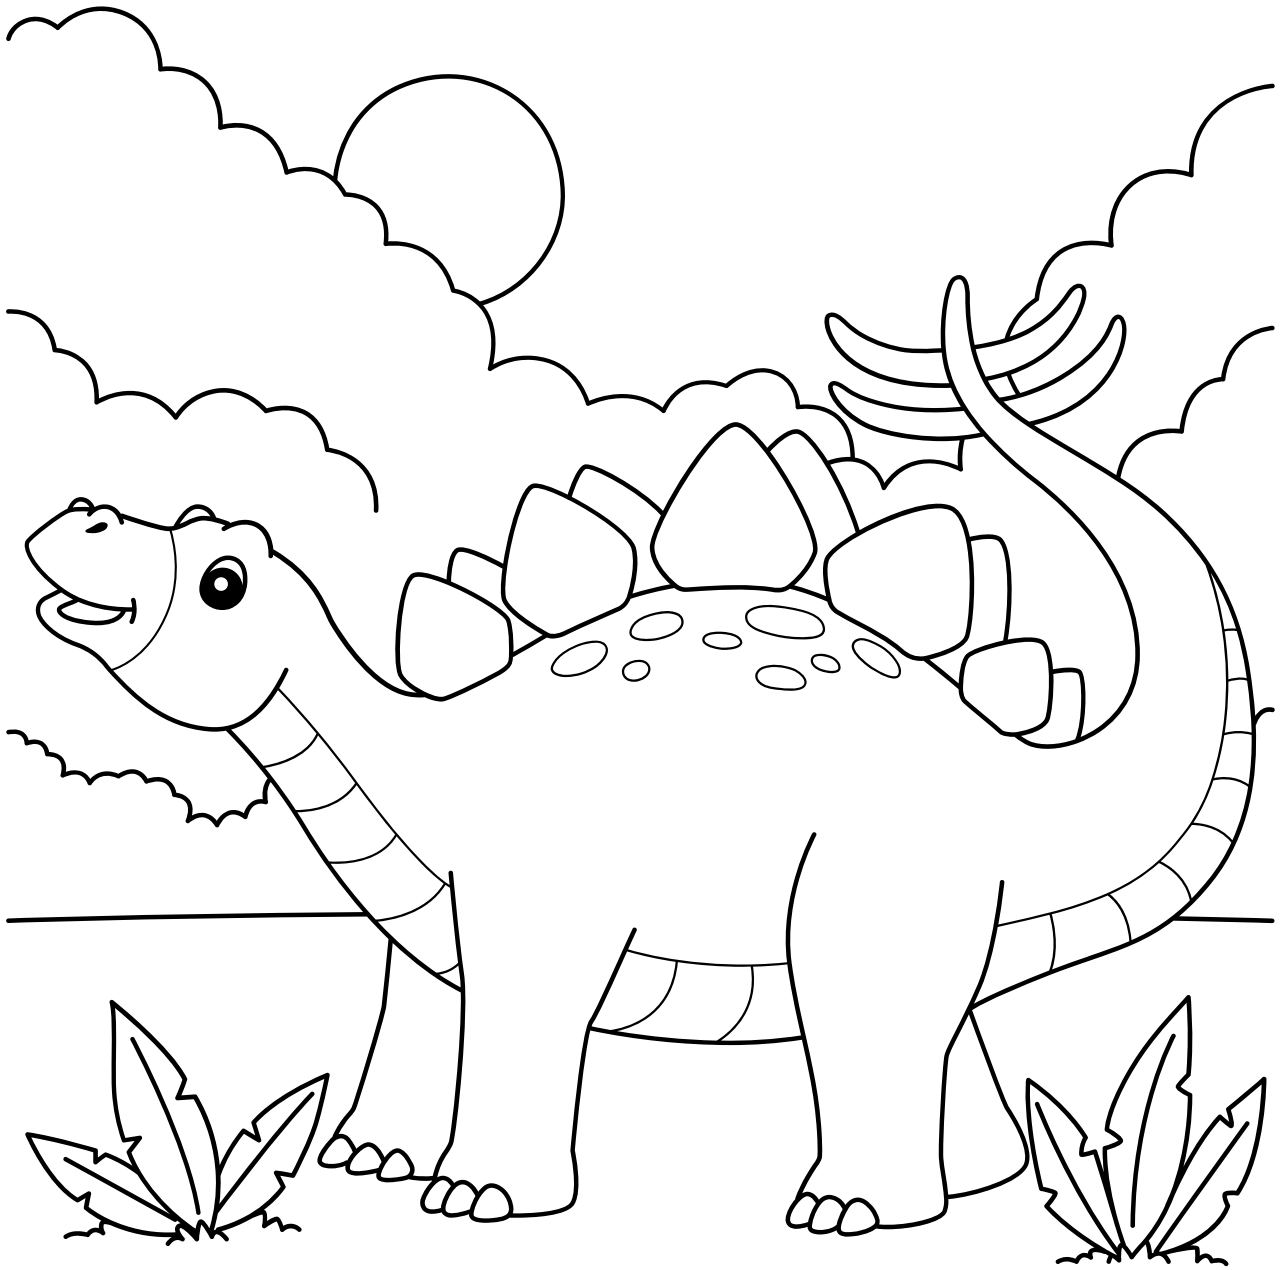

**Plesiozaurii erau reptile
marine.**

Xenoceratops

**Gura unui Xenoceratops
avea forma gurii unei
testoase.**

Stegozaur

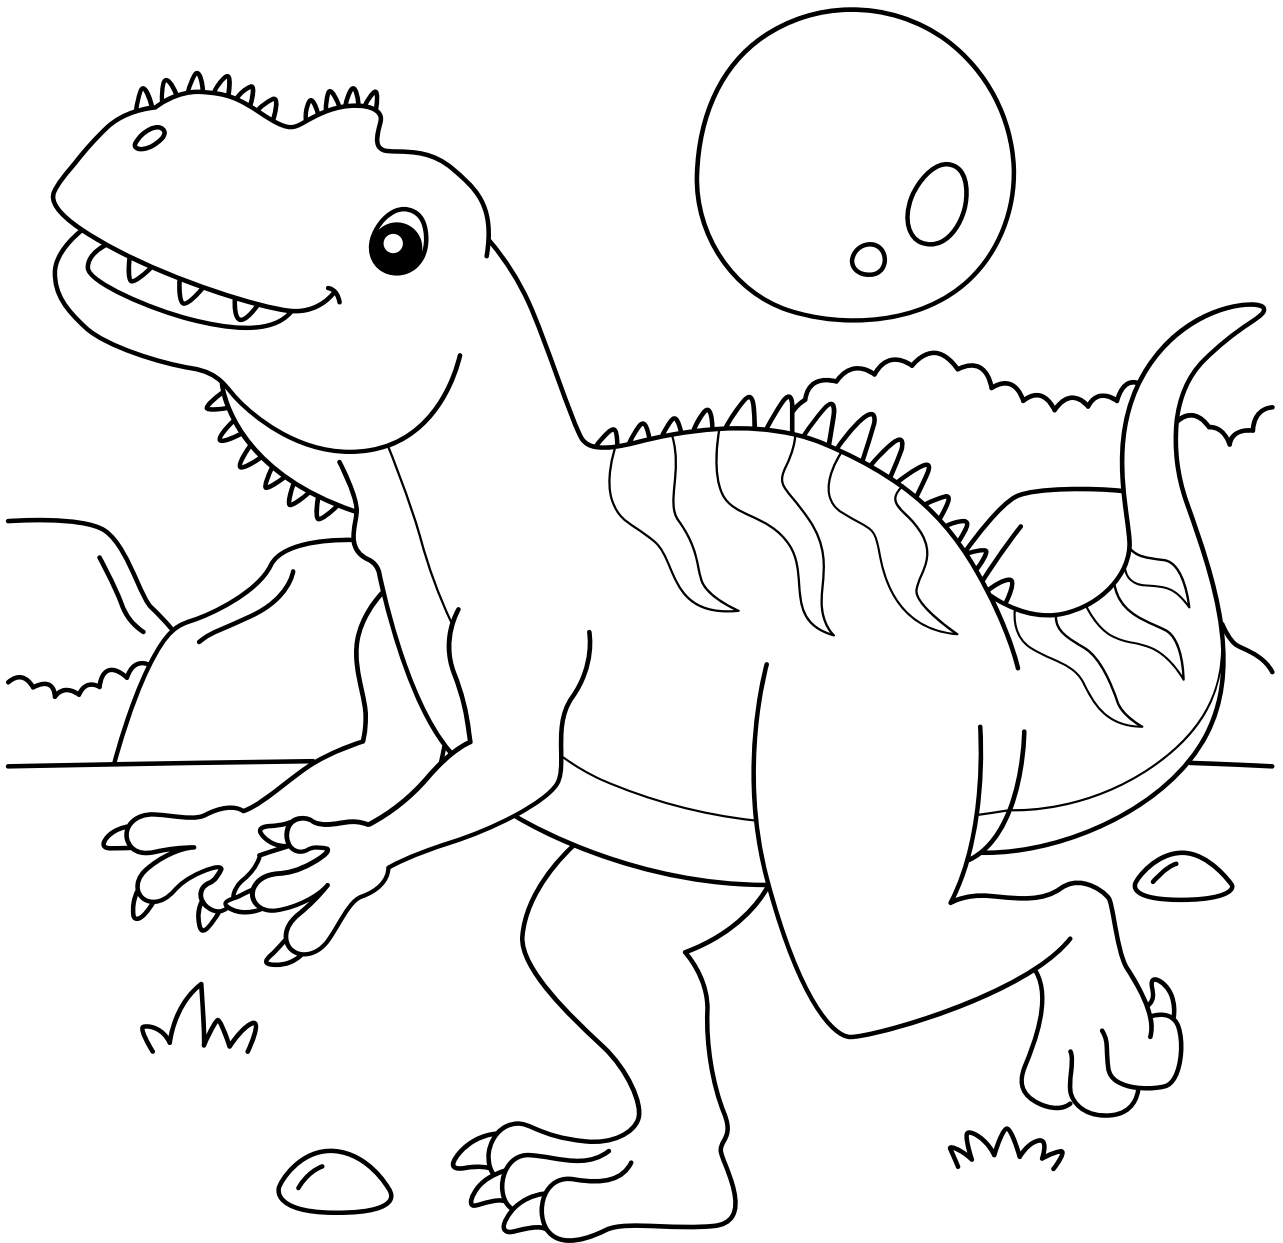

**Creierul unui Stegozaur
avea dimensiunea unui nuci.**

Oviraptor

Un oviraptor putea depune
până la 20 de ouă odată.

Yangchuanosaurus

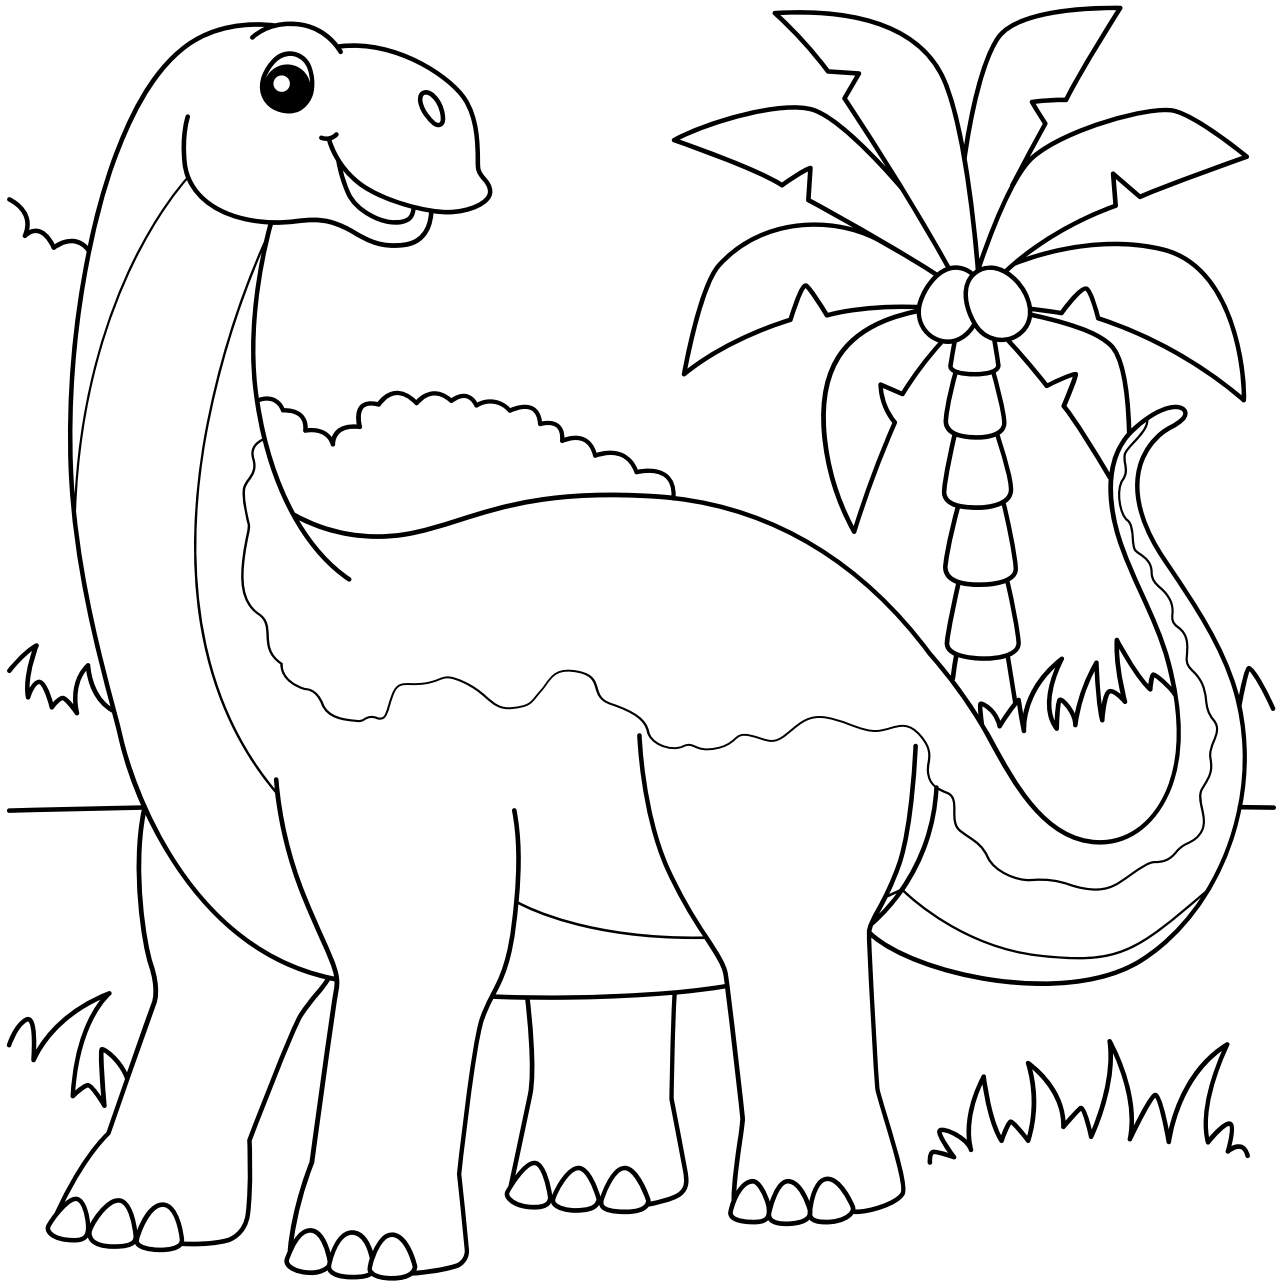

Un Yangchuanosaurus era
lung cât 3 mașini.

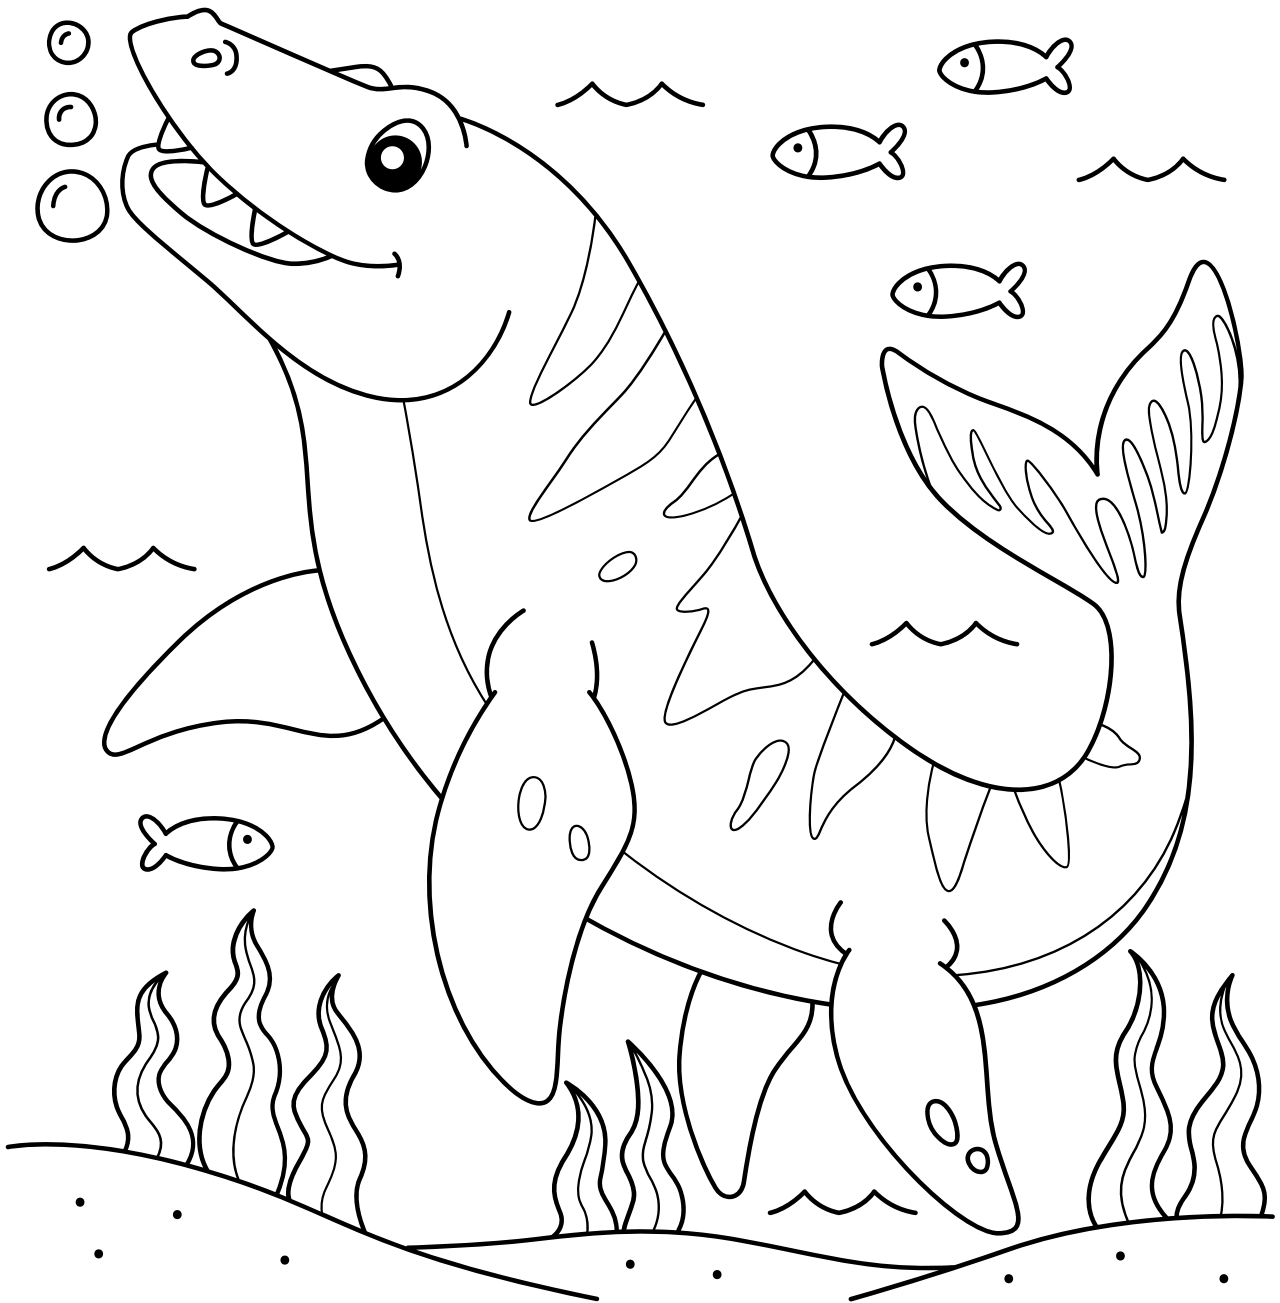

JouJou
Joaca e un lucru serios

Jobaria

**Jobaria era un ierbivor care
depunea ouă.**

Mozasaurus

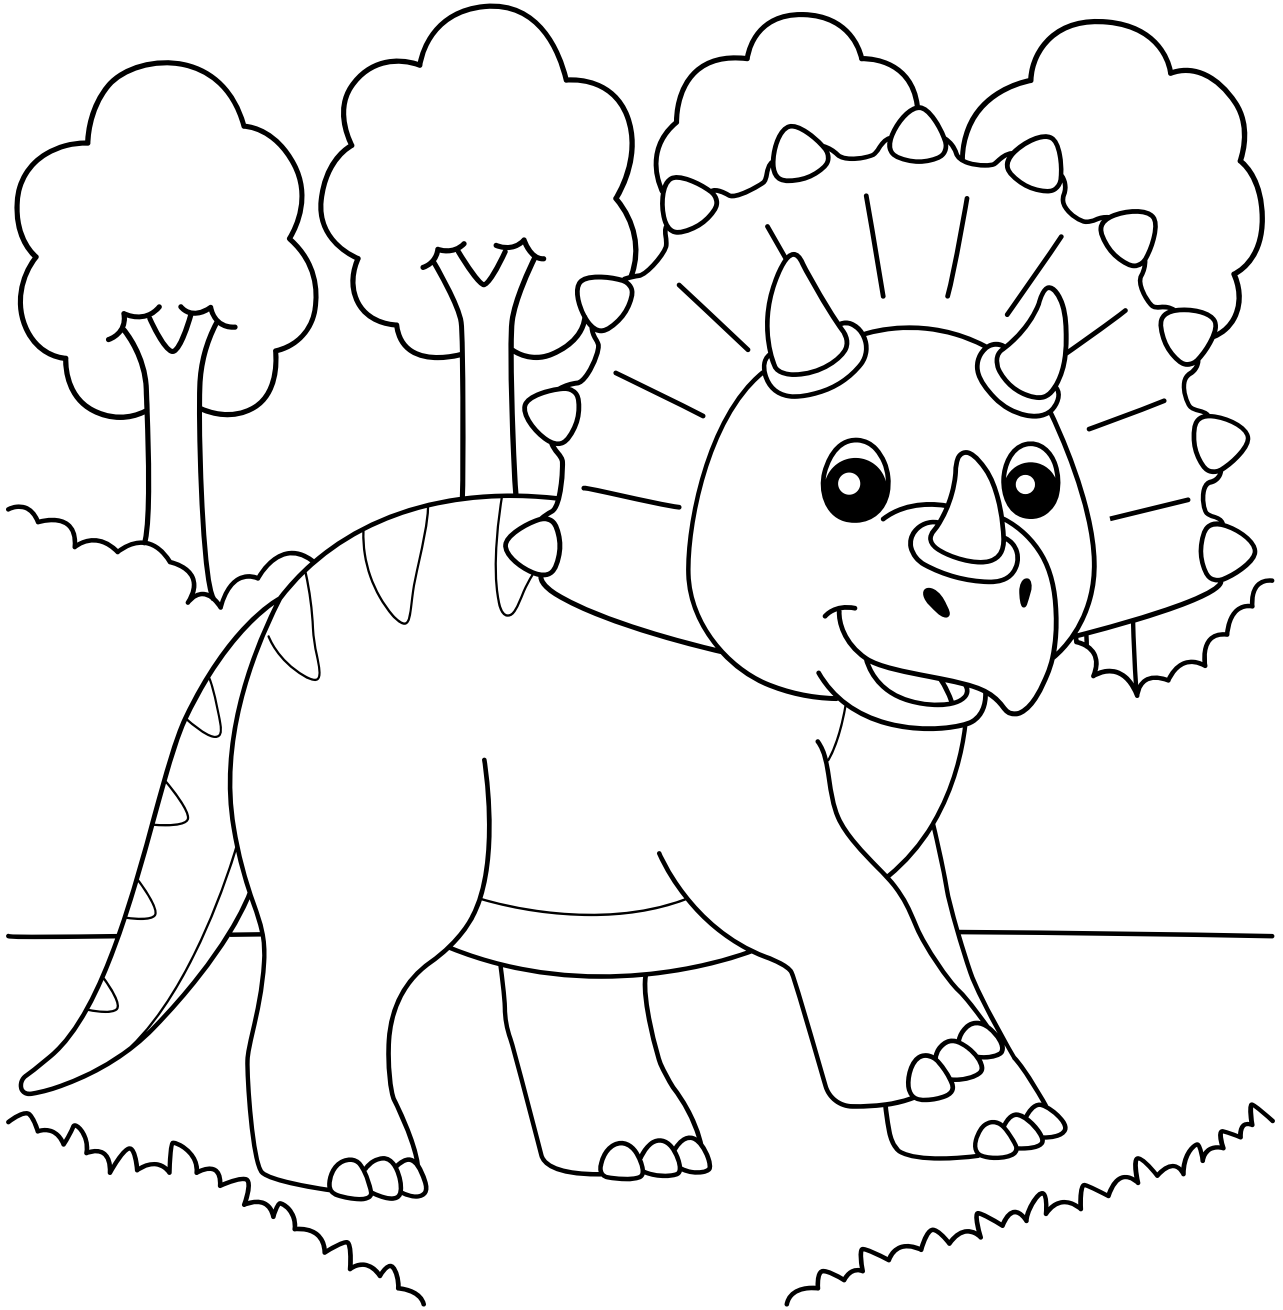

**Mozasaurus a fost găsit în
oceanele din întreaga lume.**

JouJou
Joaca e un lucru serios

Triceratops

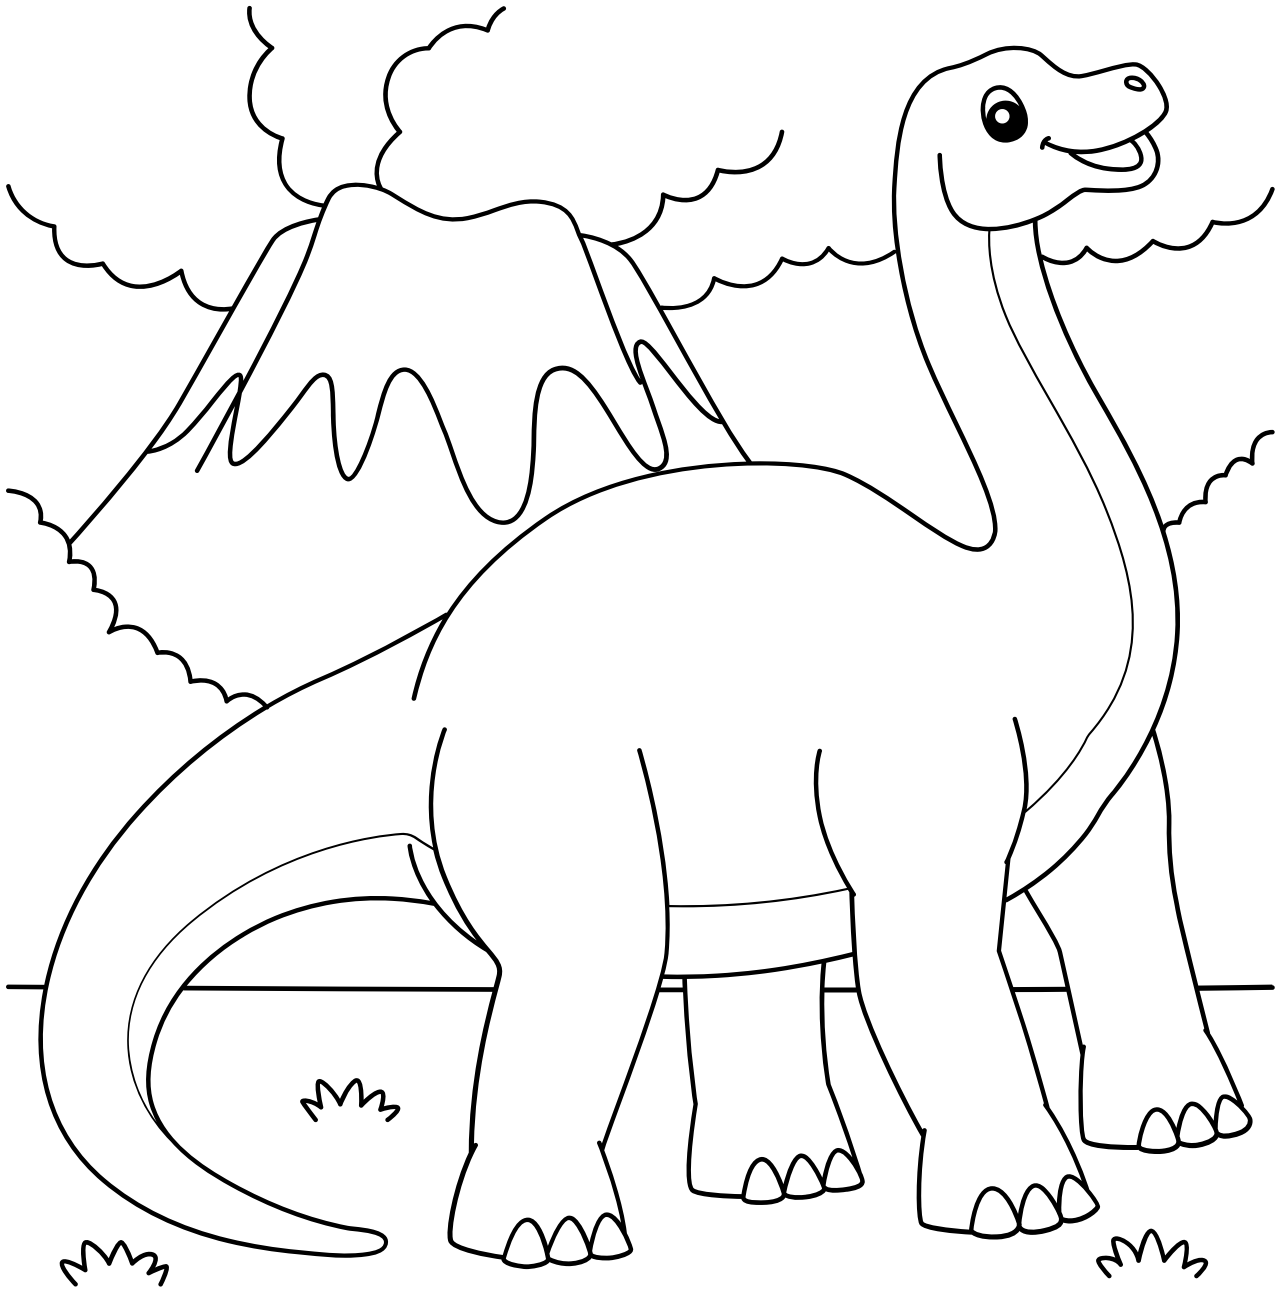

Gura unui Triceratops
actiona ca o foarfecă.

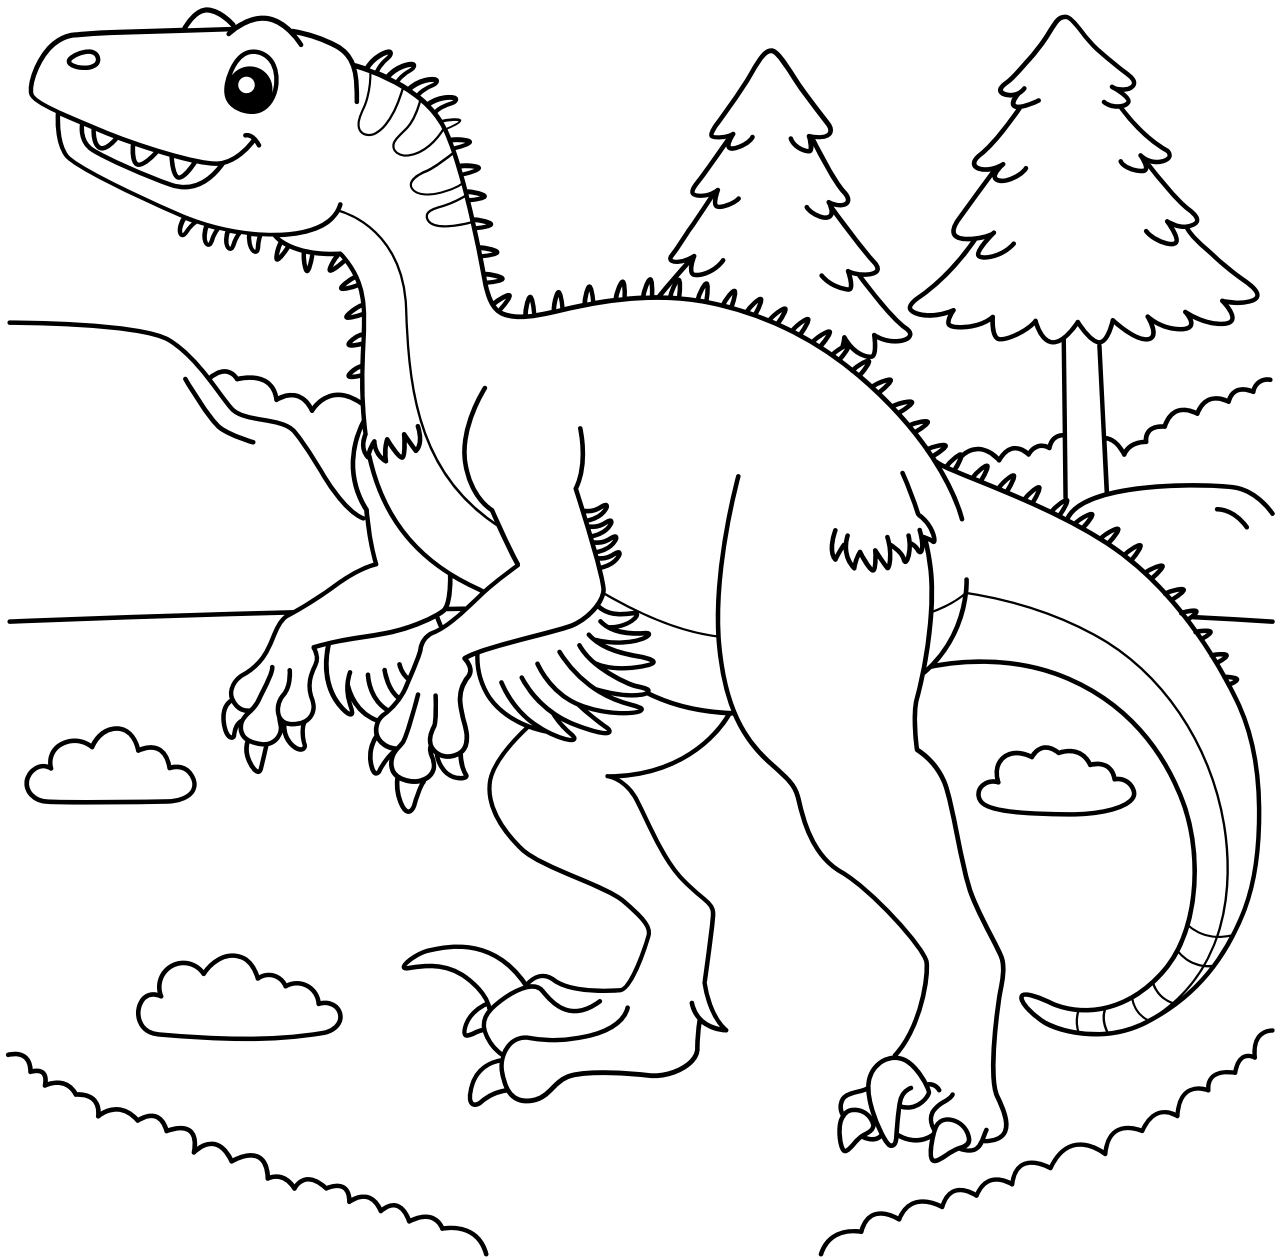

JouJou
Joaca e un lucru serios

Brontozaur

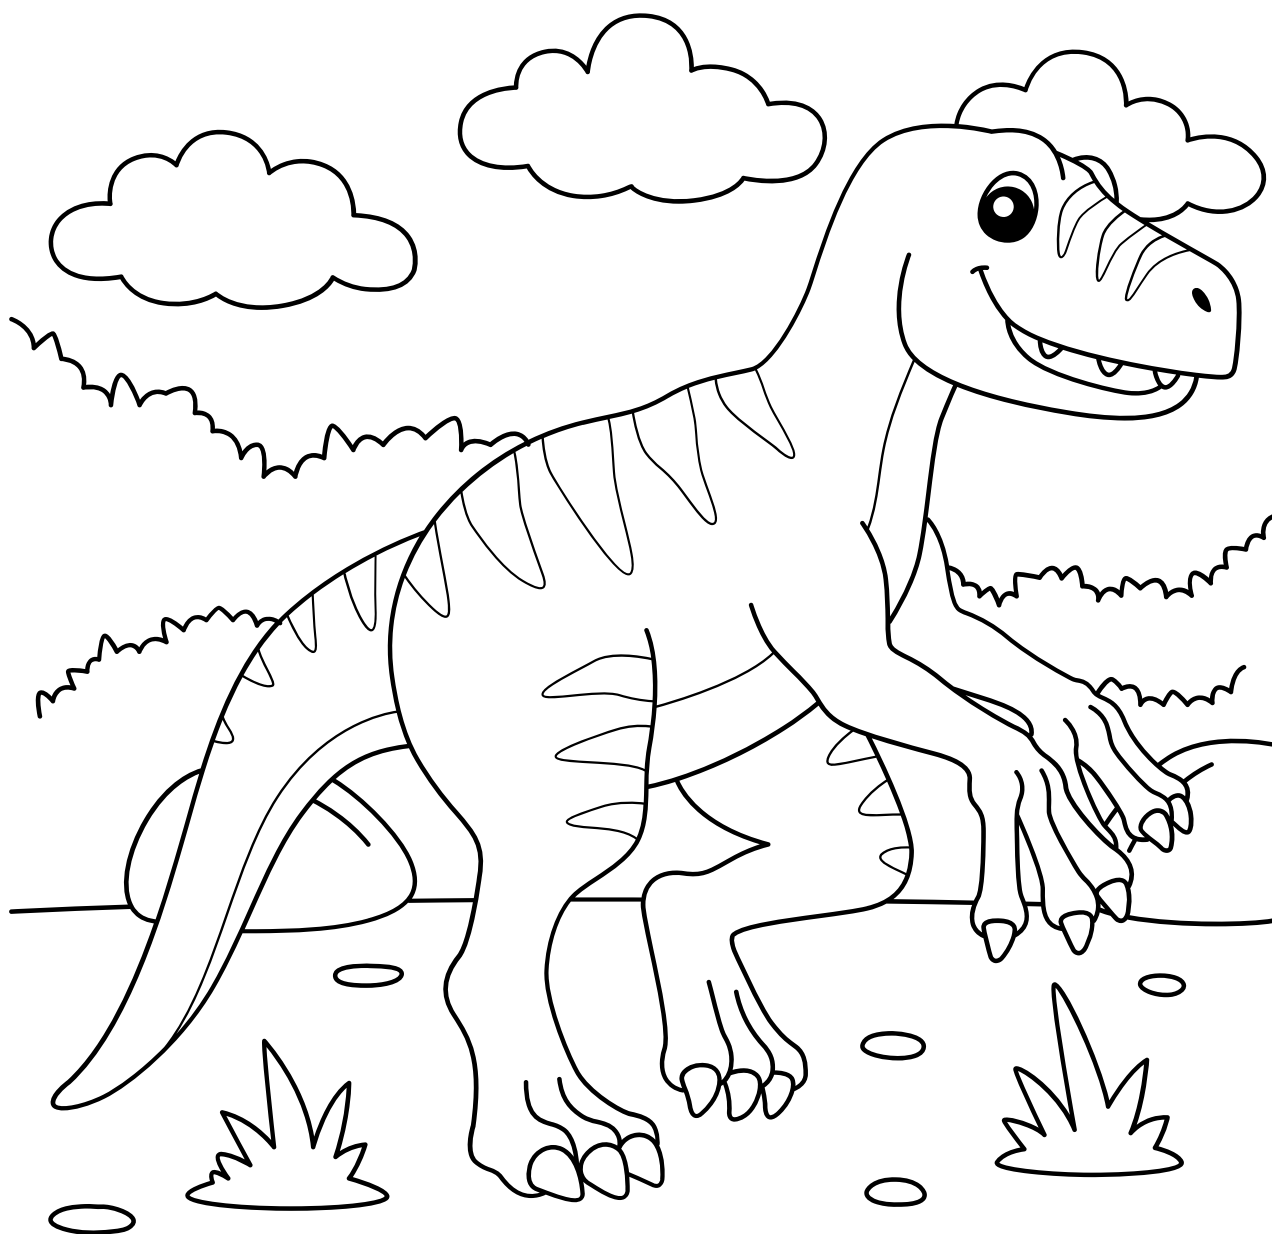

Un Brontozaur cântărea
aproximativ 33 de tone.

Utahraptor

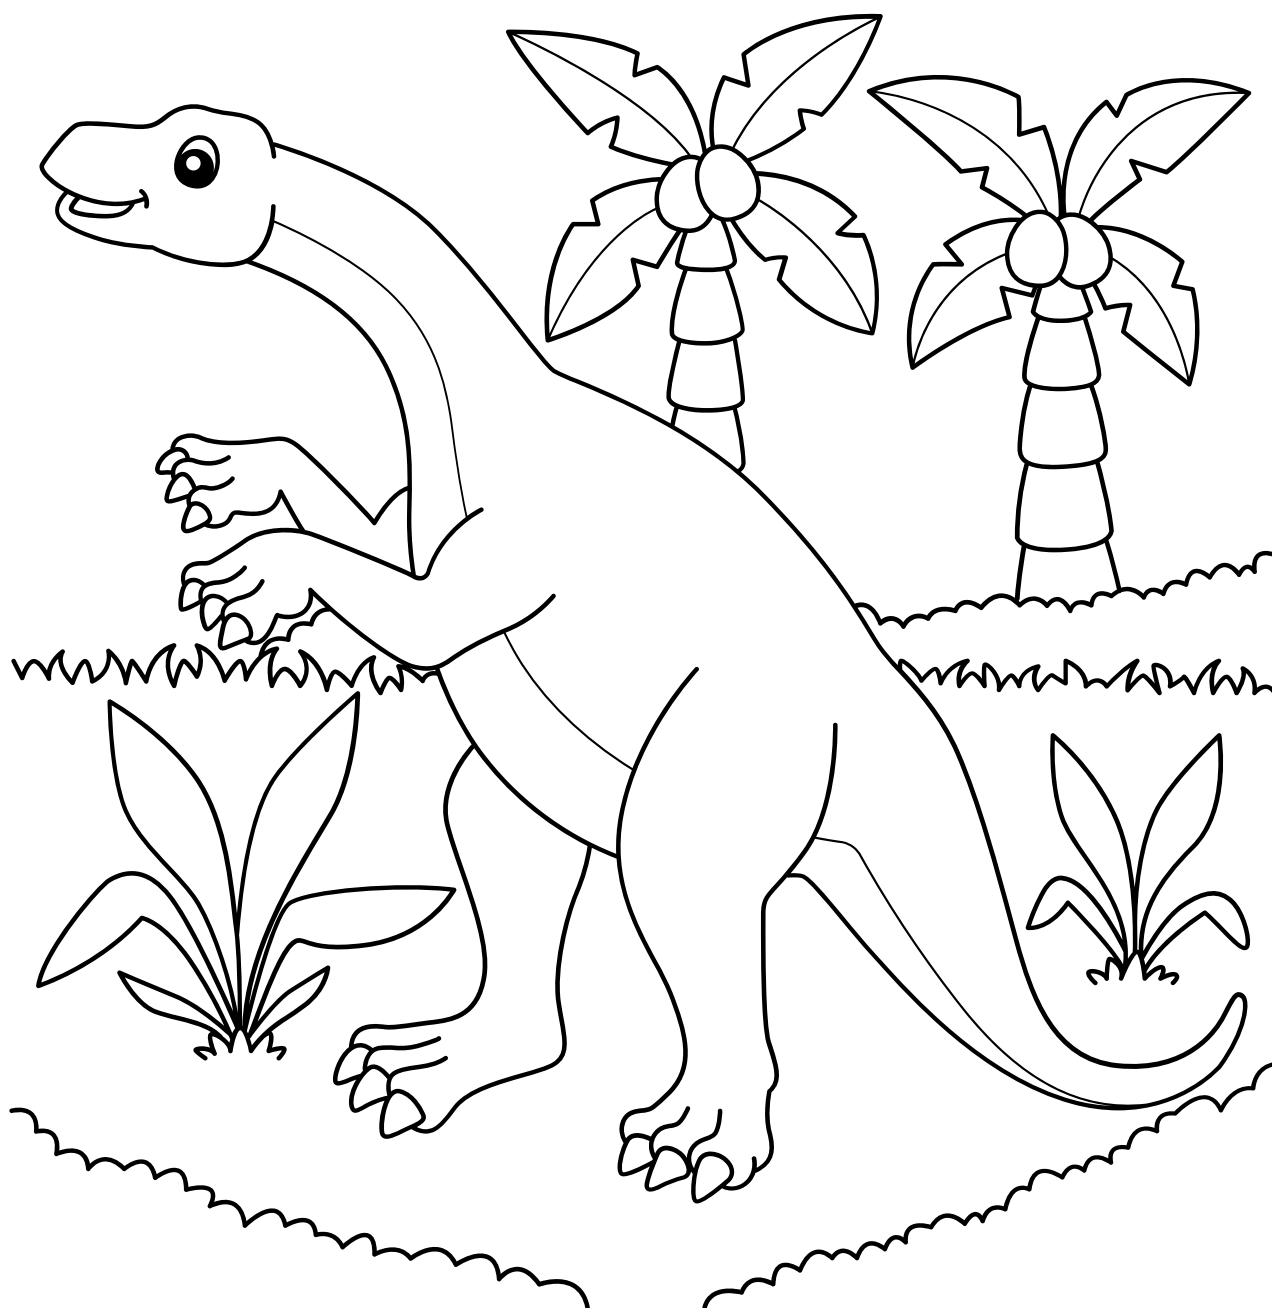

Utahraptor putea sări la
aproape 5 metri înăltime.

Velociraptor

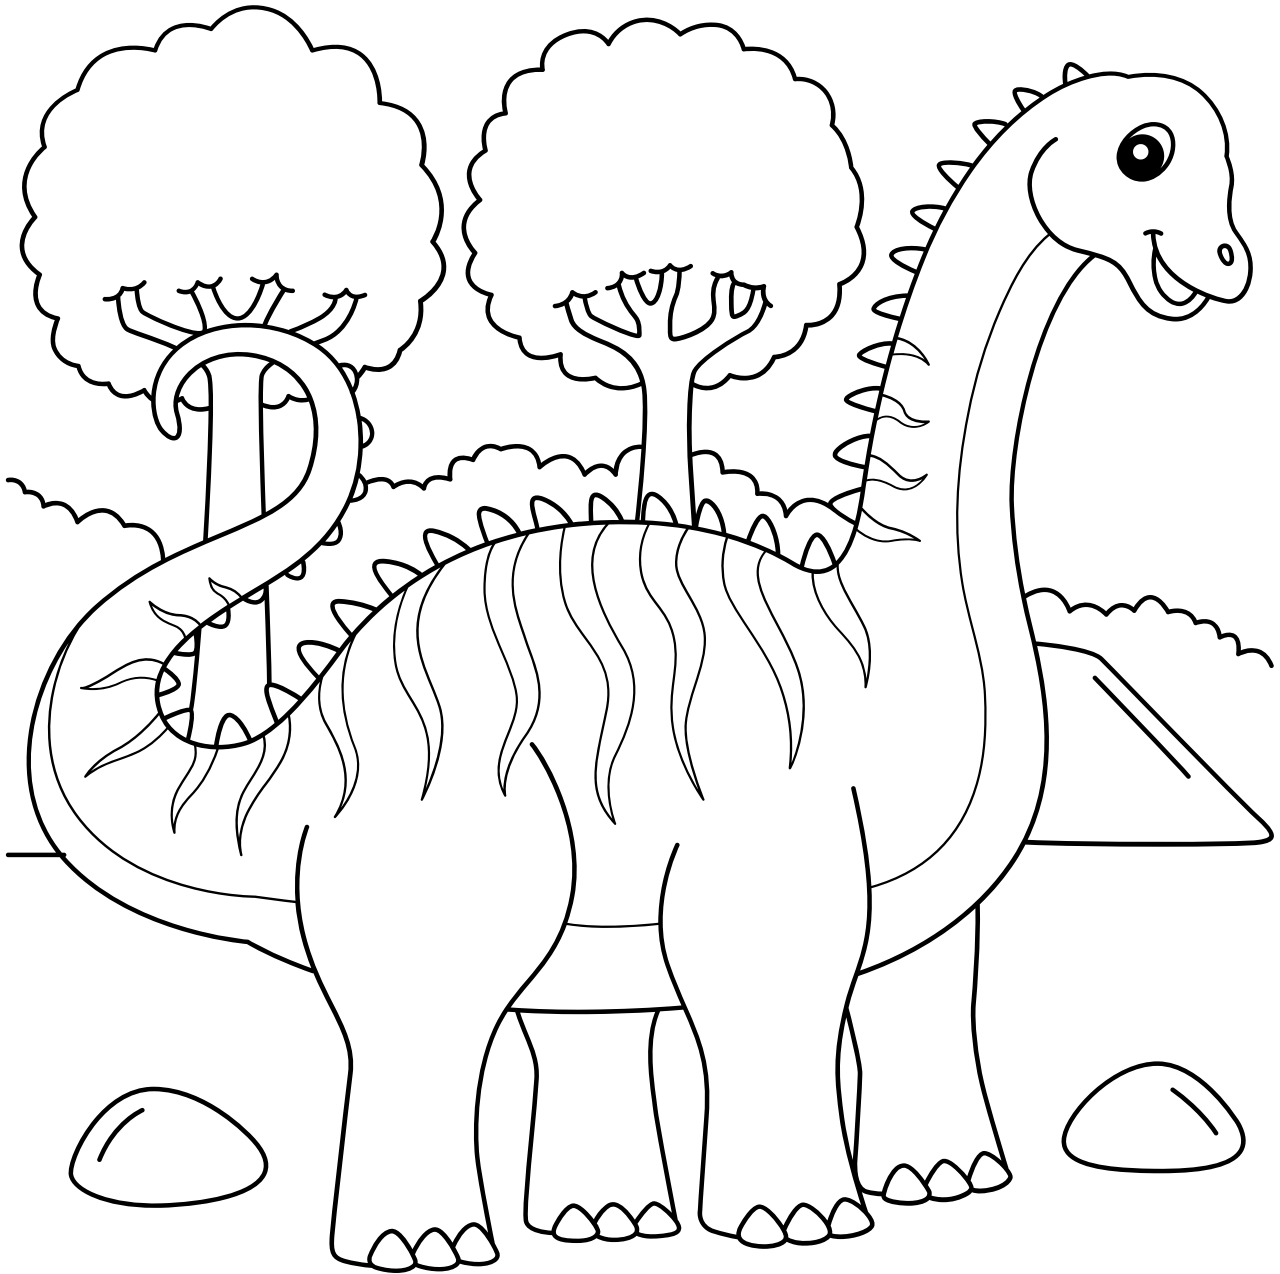

**Velociraptor putea alerga
incredibil de repede.**

Lufengosaurus

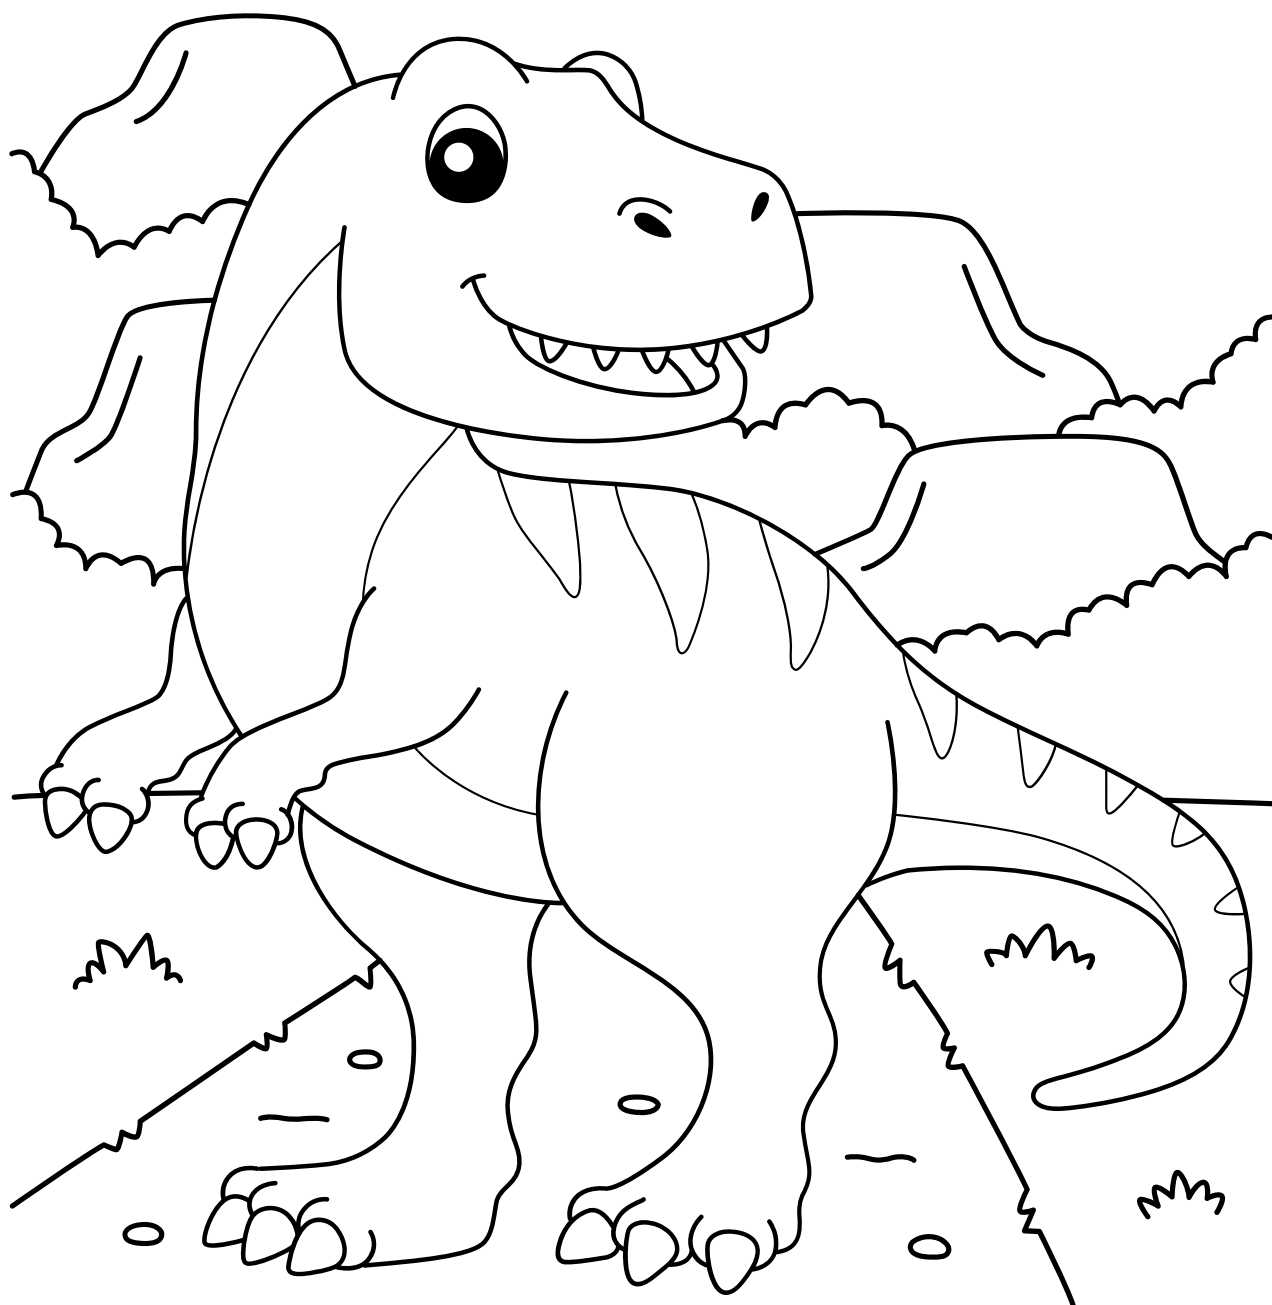

Lufengosaurus era ierbivor.

Diplodocus

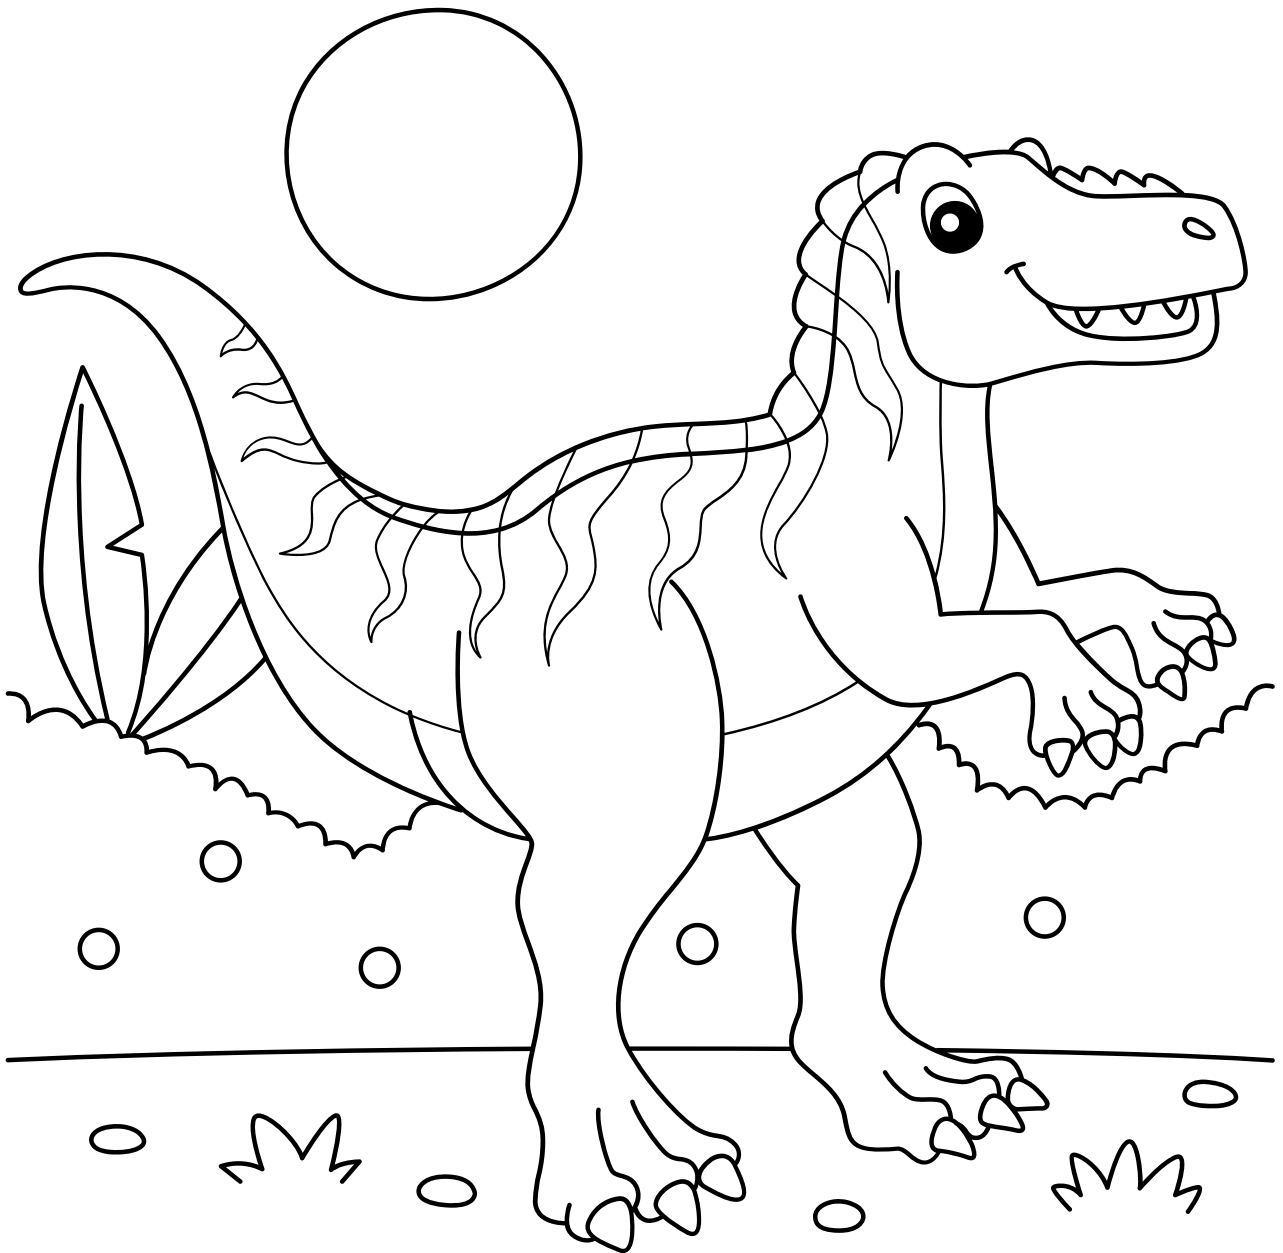

**Diplodocus înseamnă
„șopârlă cu fascicule duble”.**

Tyrannosaurus rex

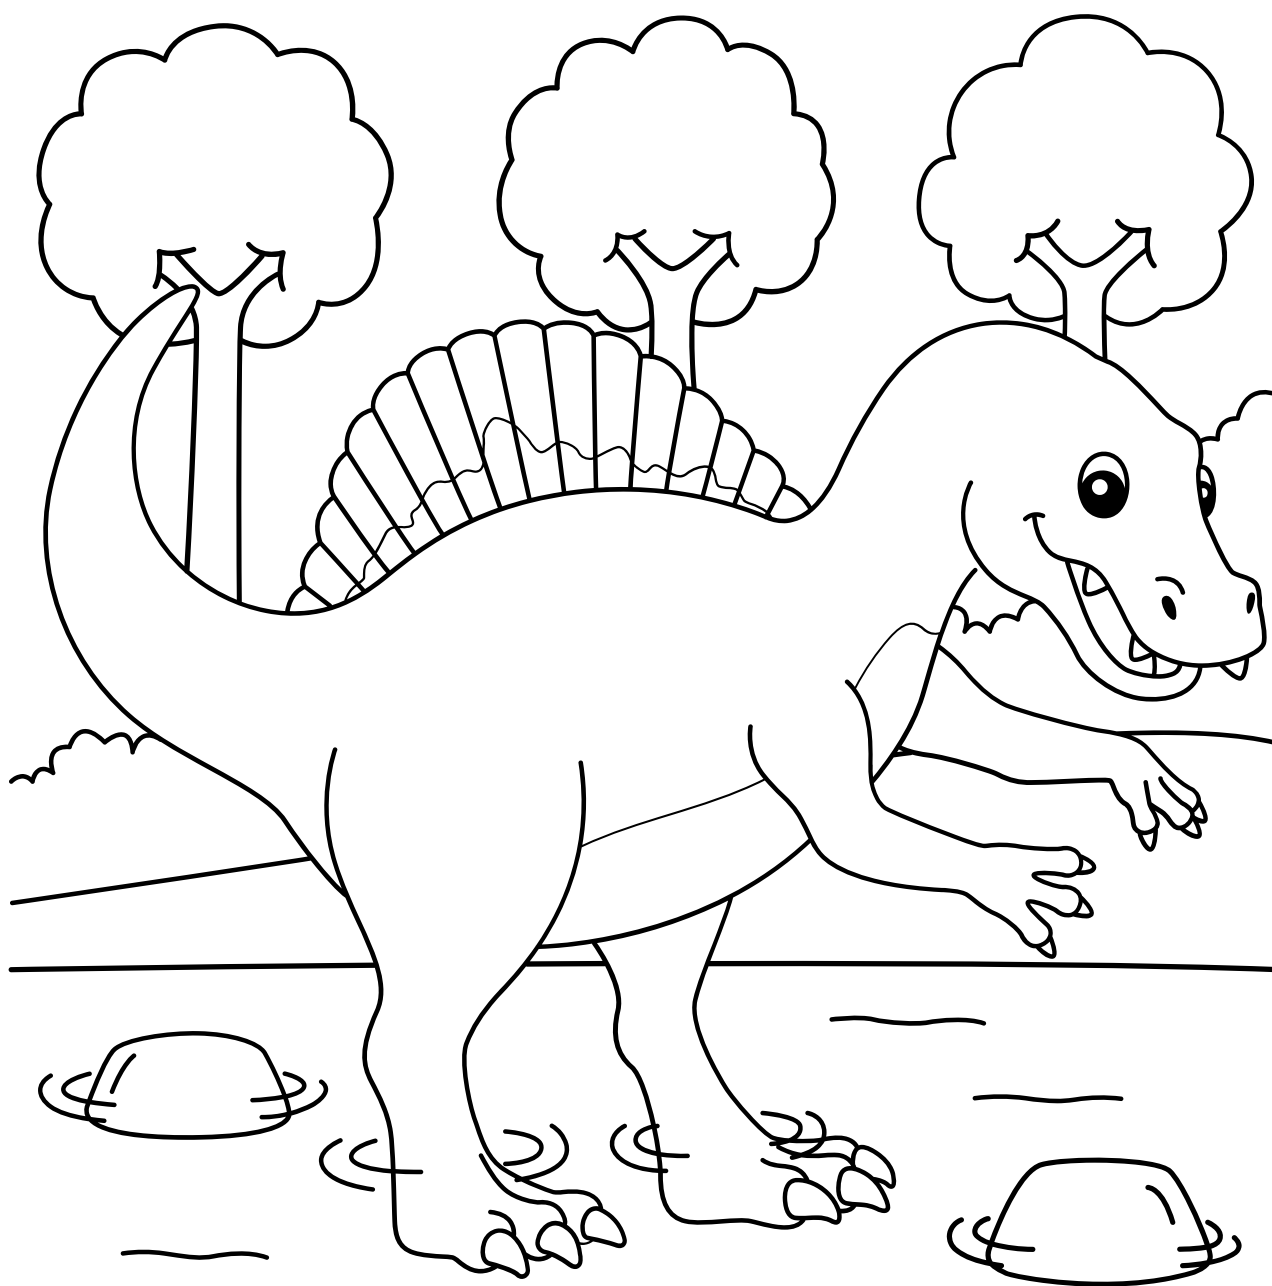

**Tiranozaur înseamnă
„șopârlă tirană”.**

Fukuiraptor

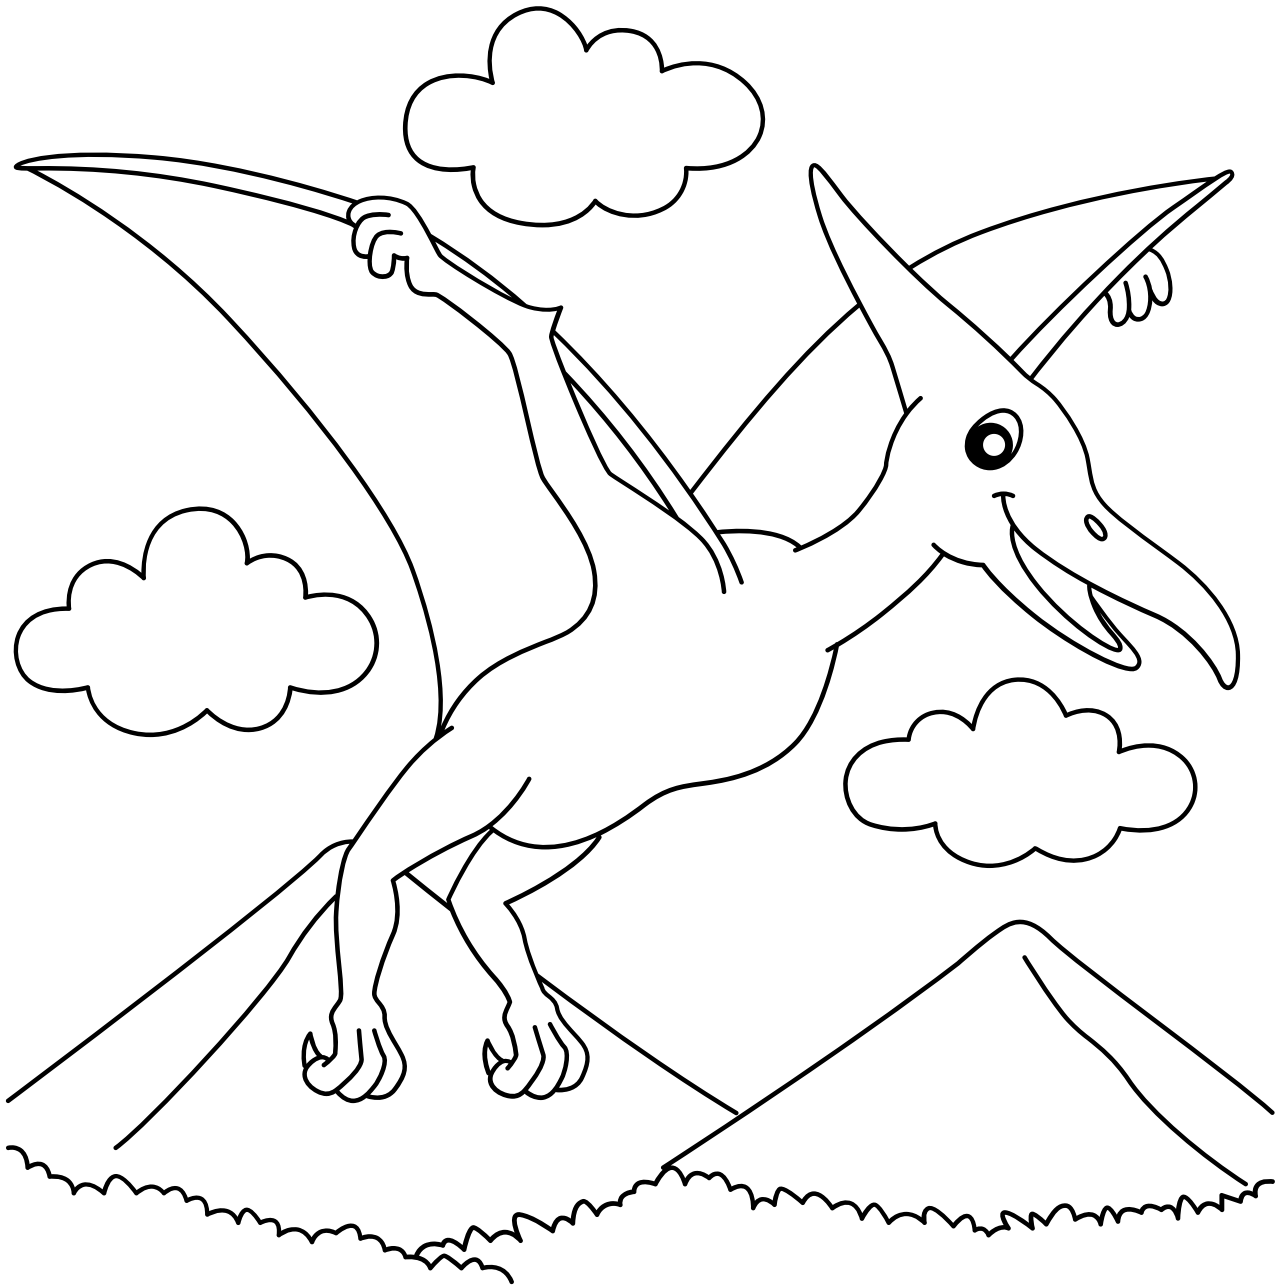

**Fukuiraptor a trăit acum
136 de milioane de ani.**

Spinozaur

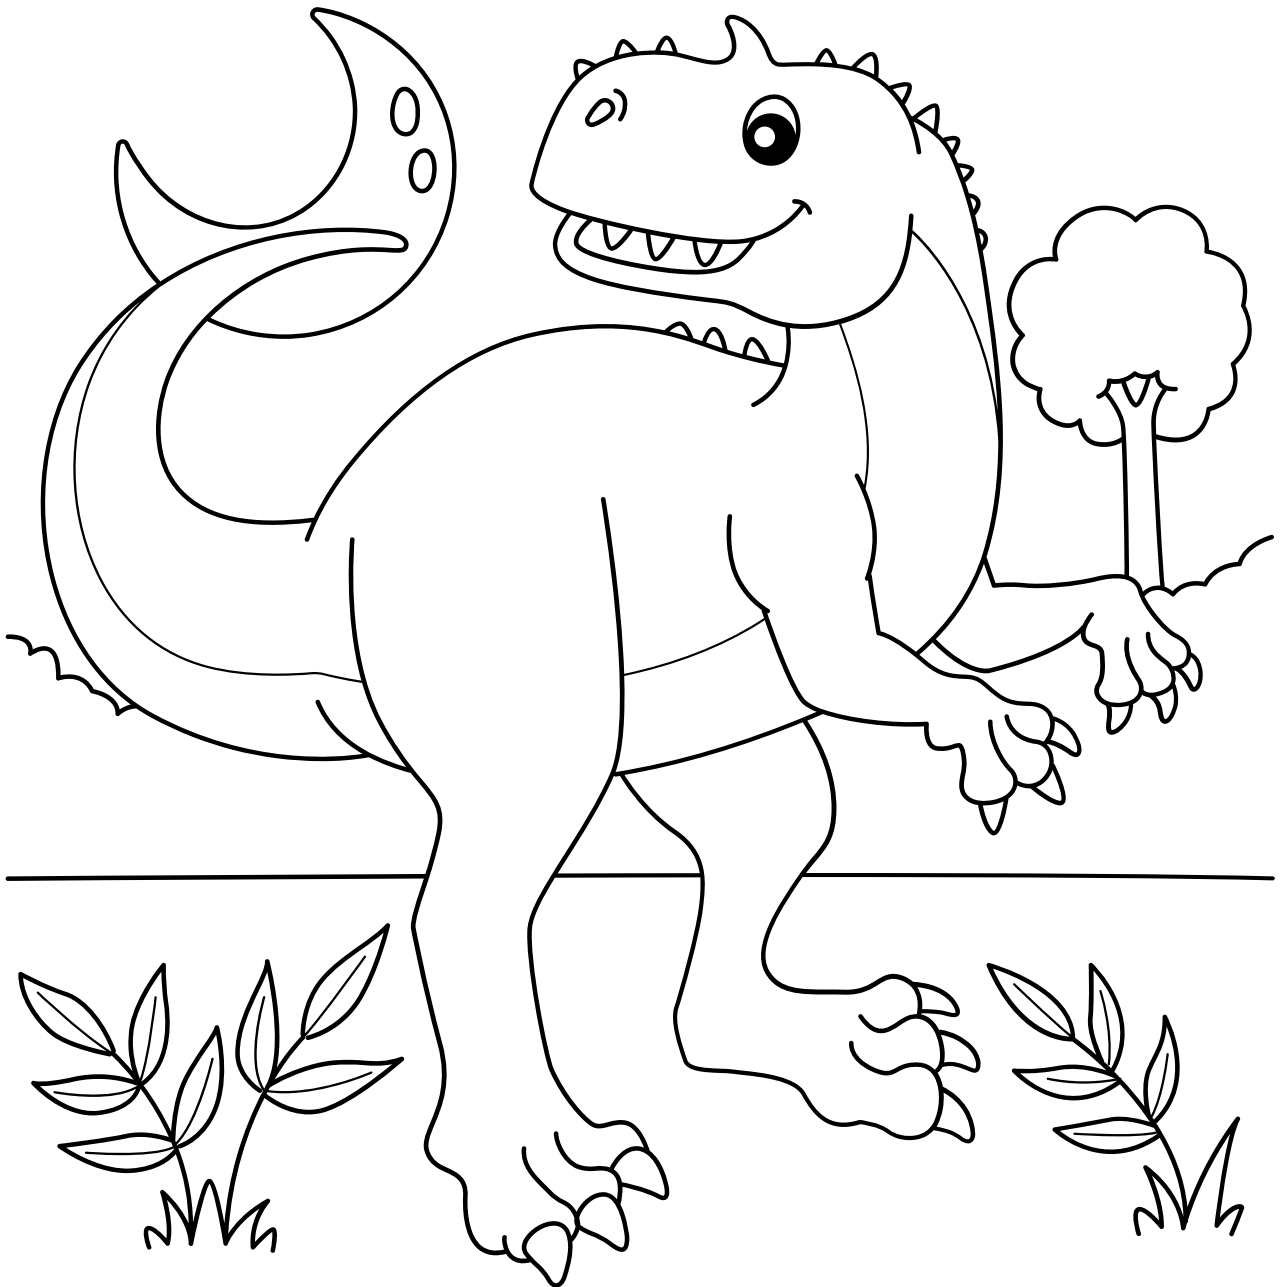

Spinozaurul a fost cel mai
mare prădător terestru.

Pterodactil

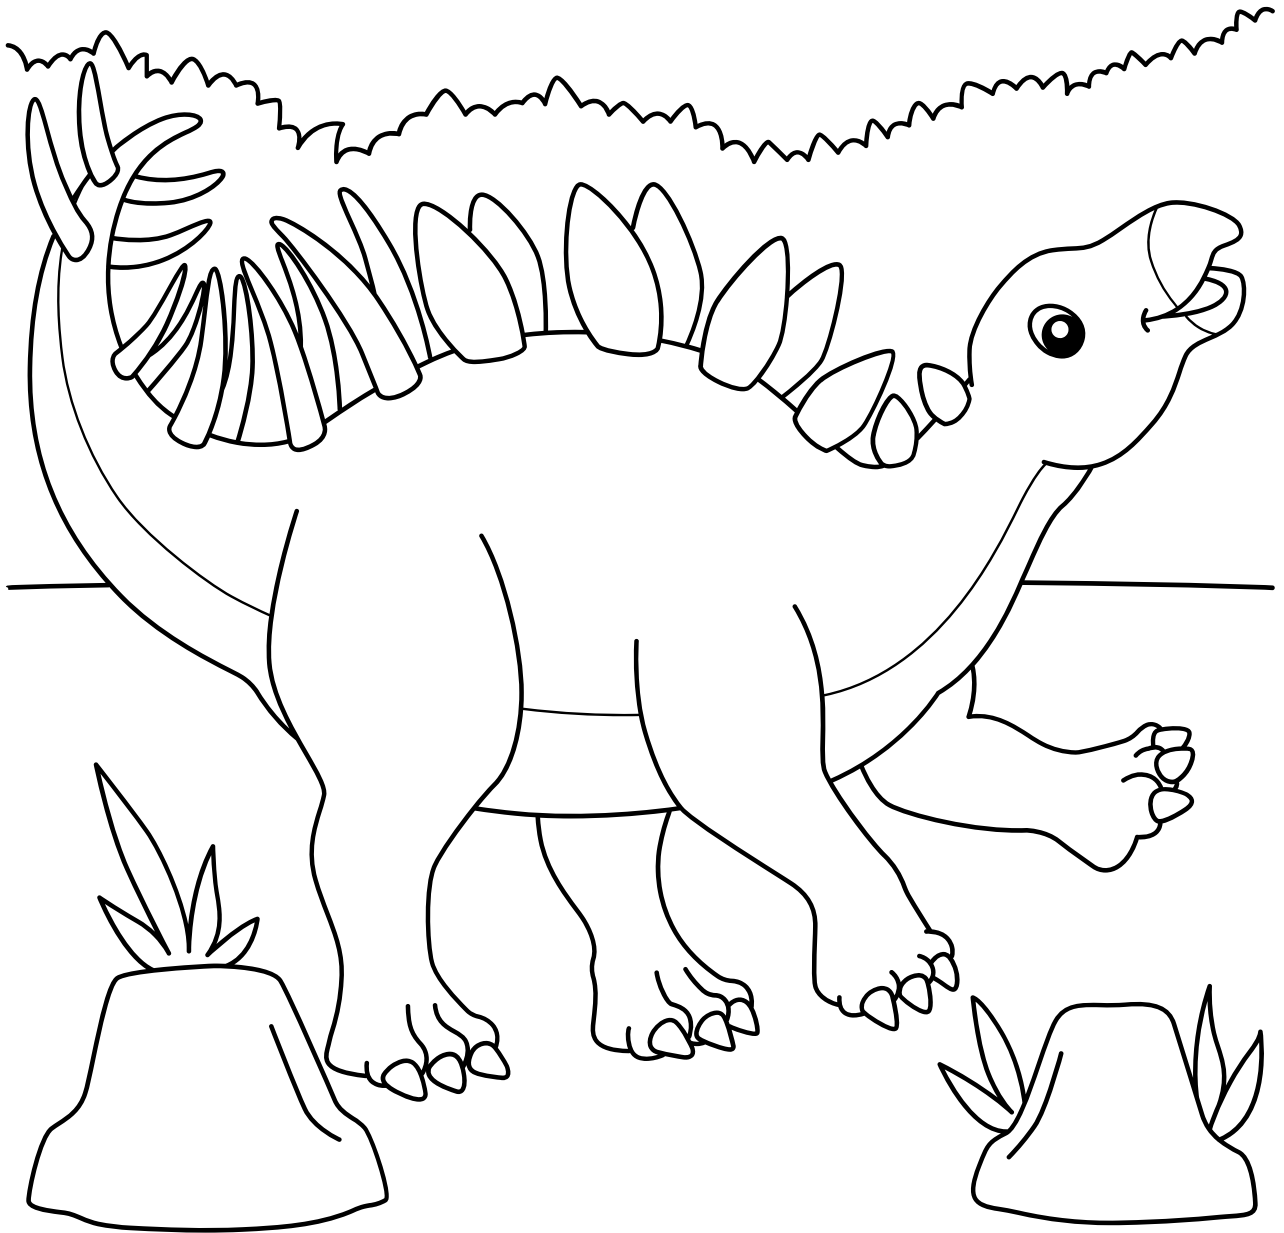

**Pterodactil era o reptilă
zburătoare.**

Rajasaurus

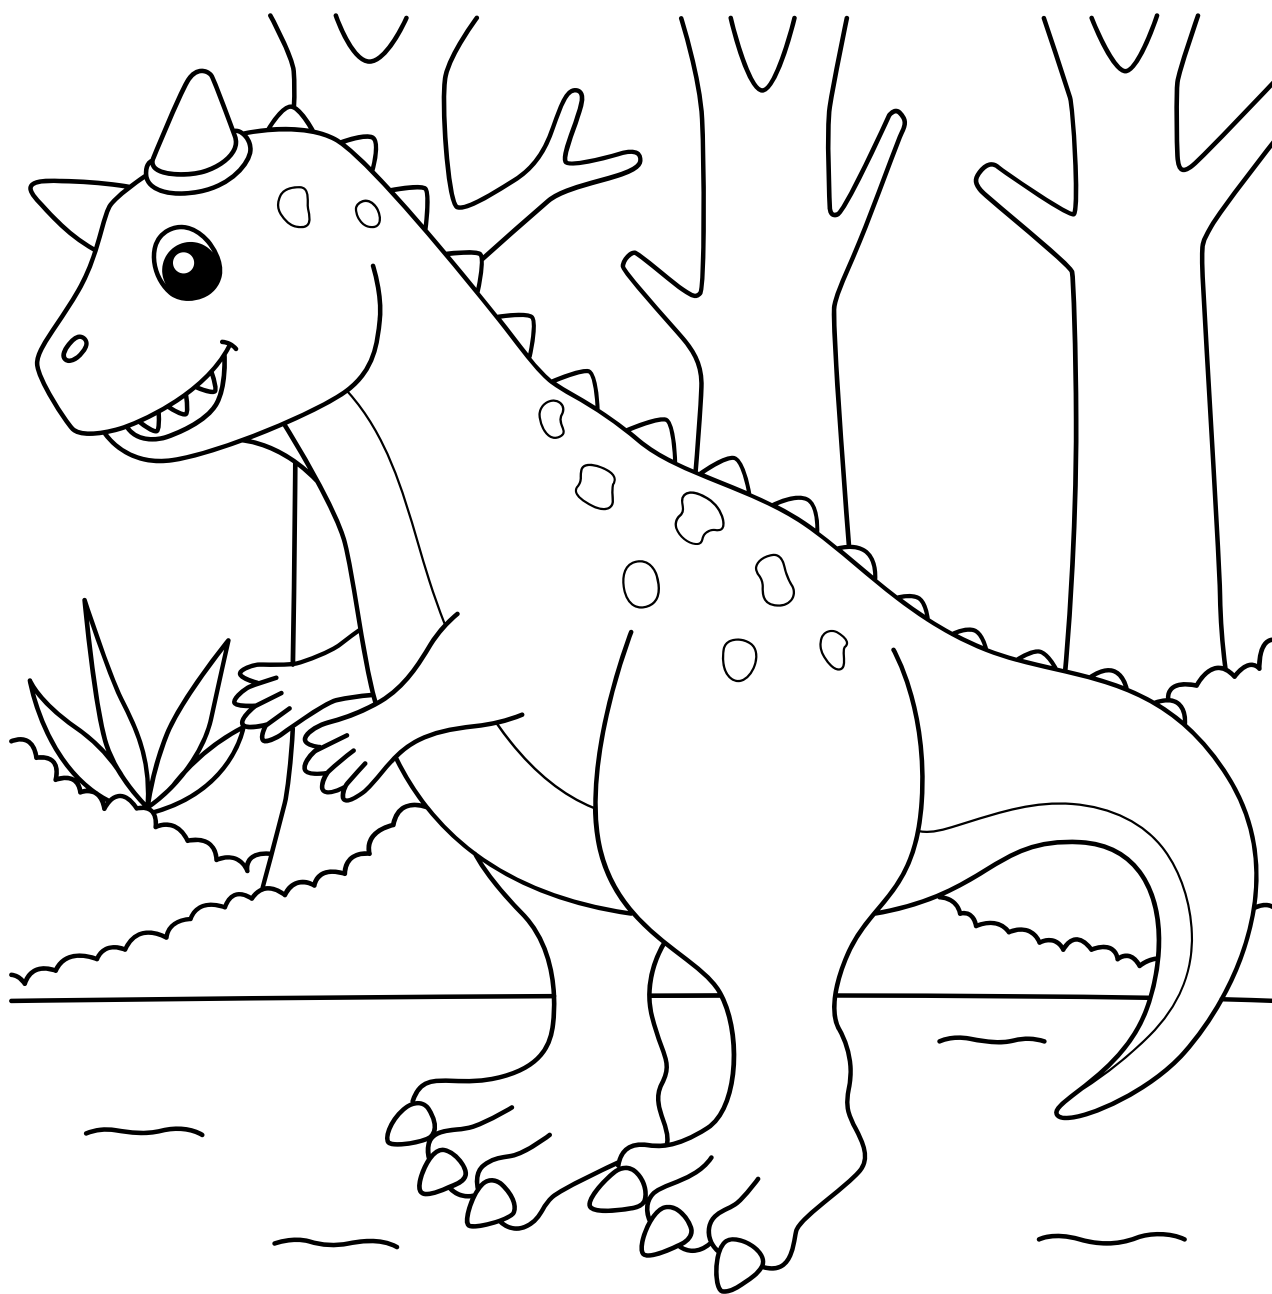

**Rajasaurus era un carnivor
care depunea ouă.**

Kentrosaurus

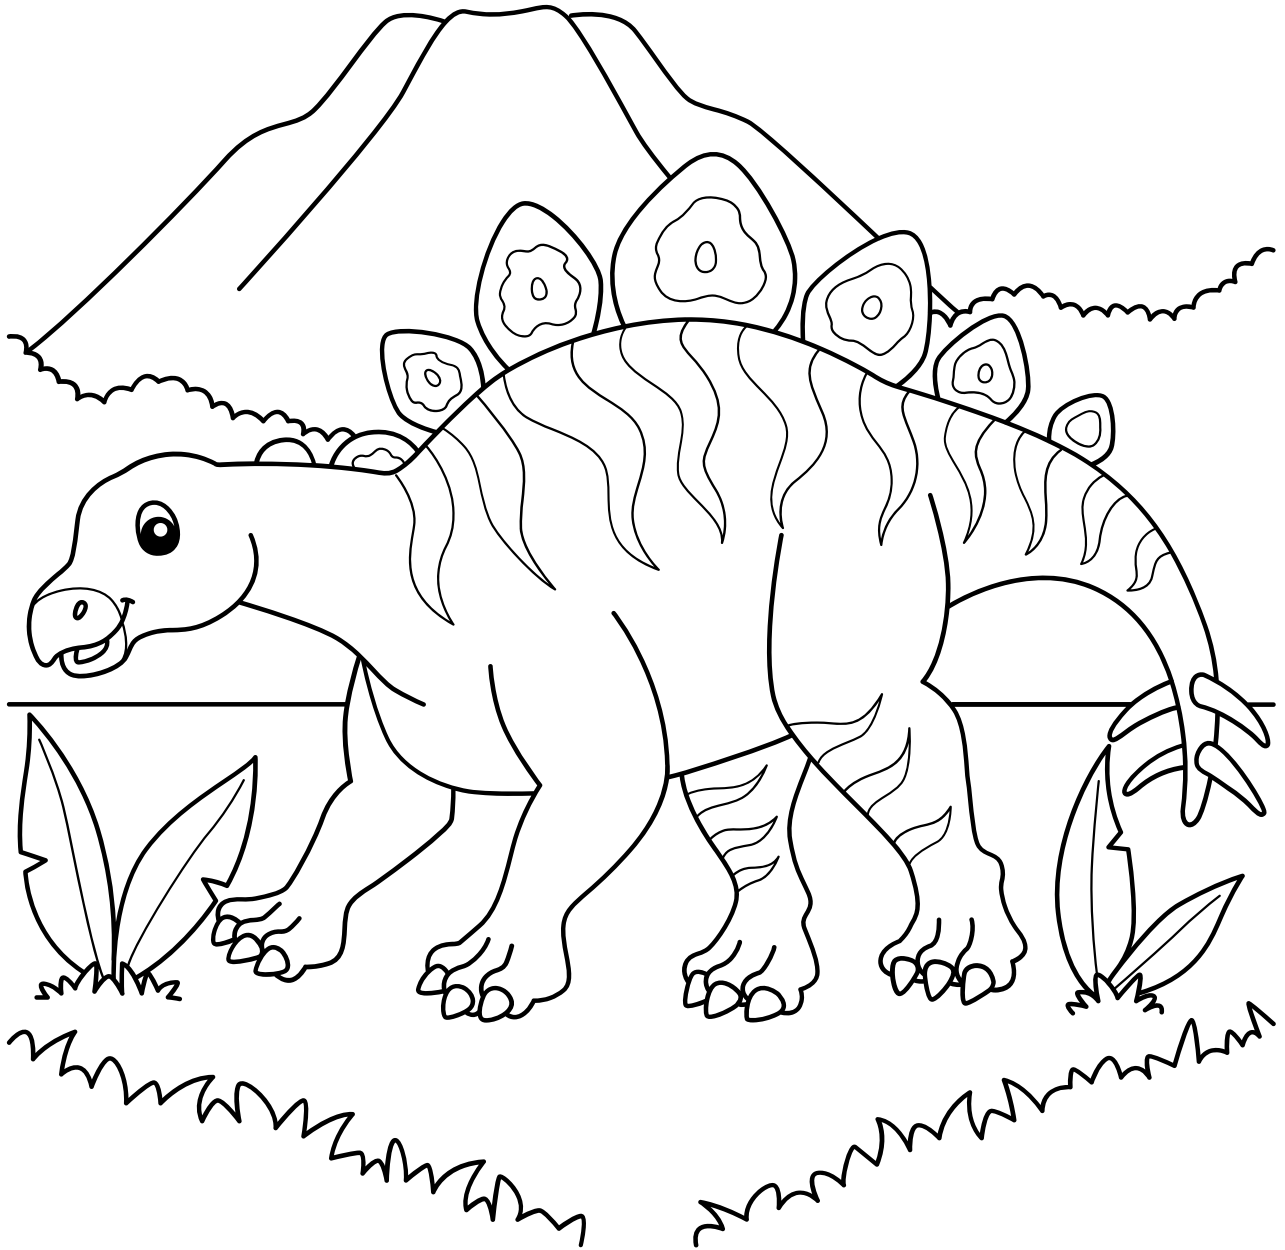

**Kentrosaurus înseamnă
„șopârlă cu țepi”.**

Carnozaur

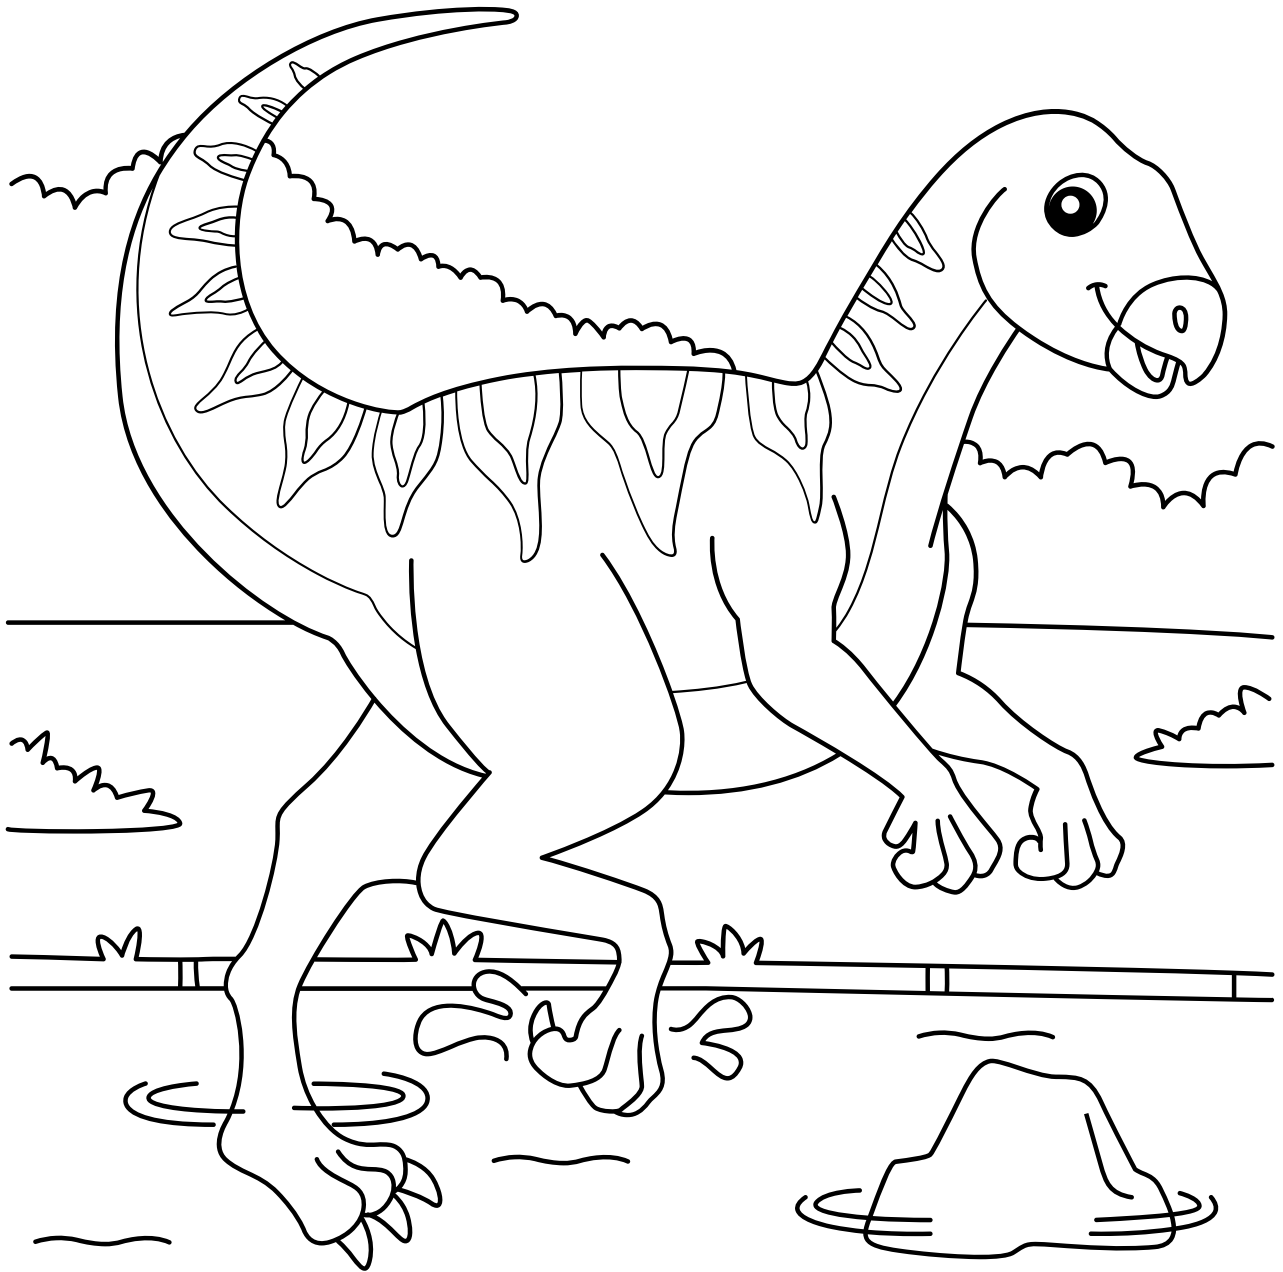

**Carnozaurul avea brate mici
și putea alerga repede.**

Hesperosaurus

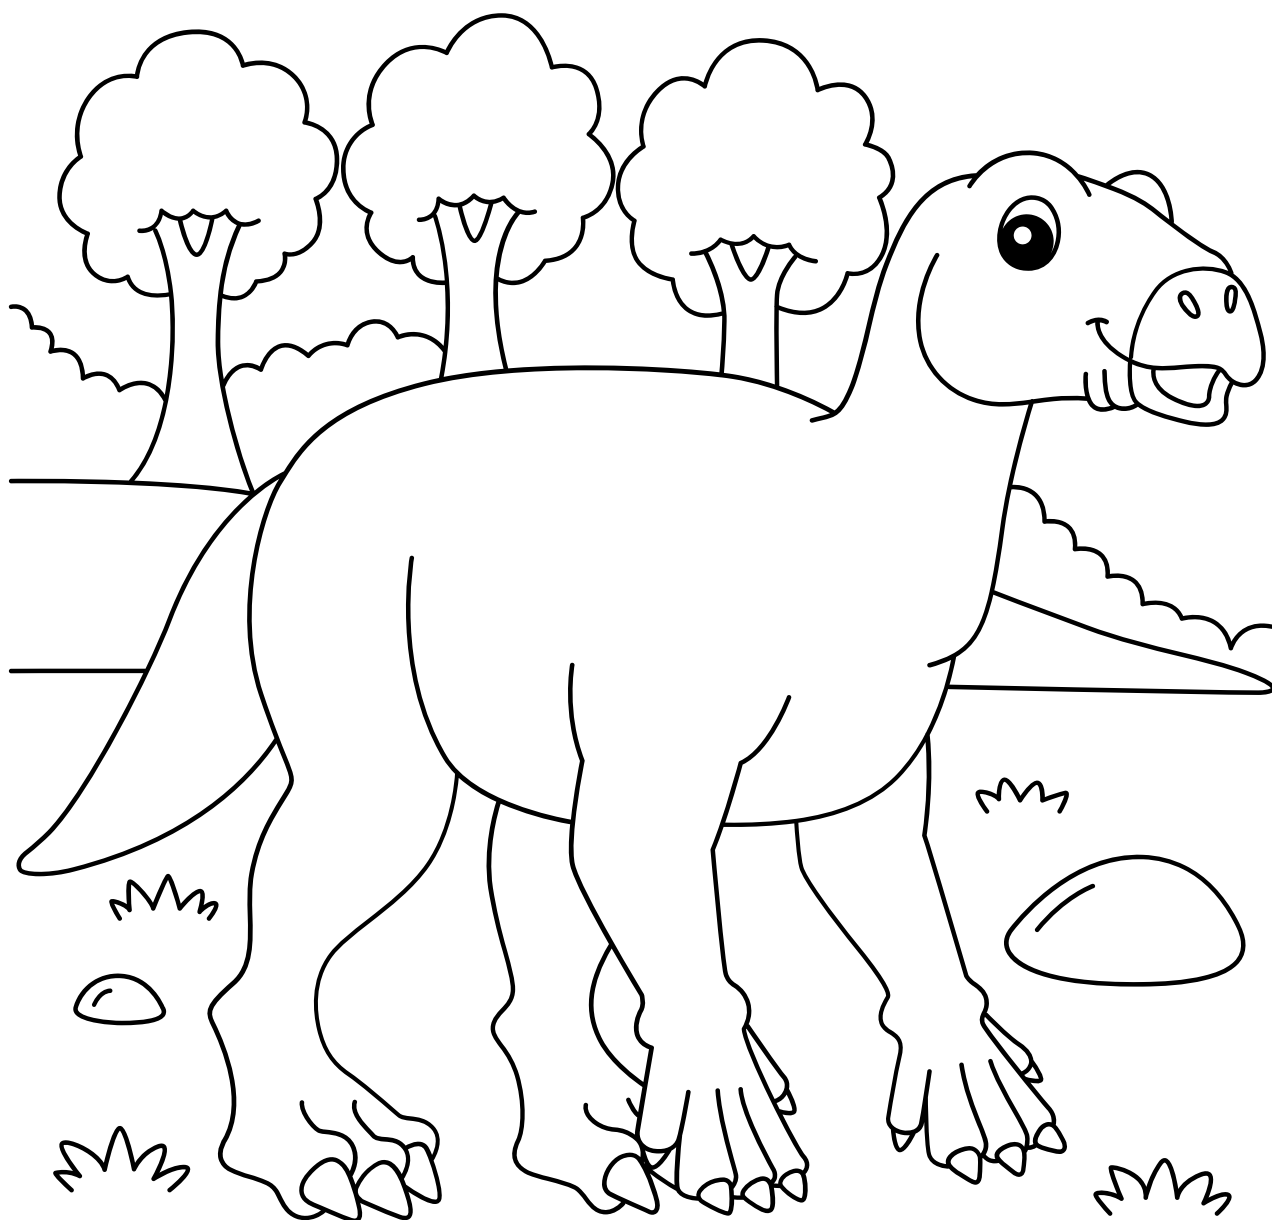

**Hesperosaurus înseamnă
„șopârlă de vest”.**

Qantassaurus

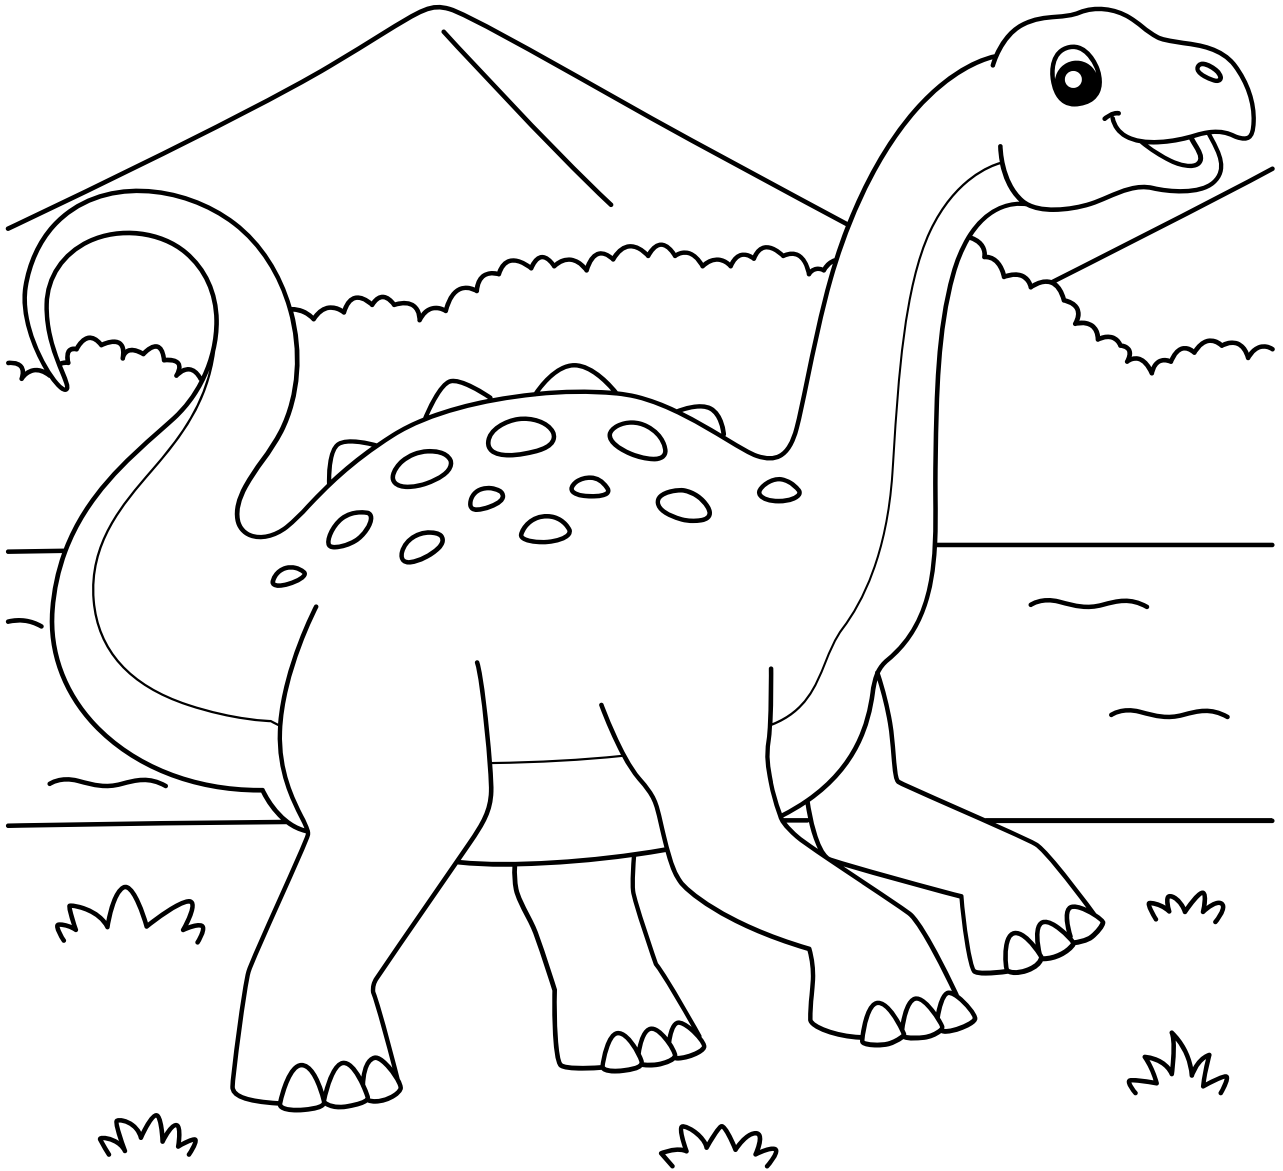

**Qantassaurus a trăit în
Australia.**

Iguanodon

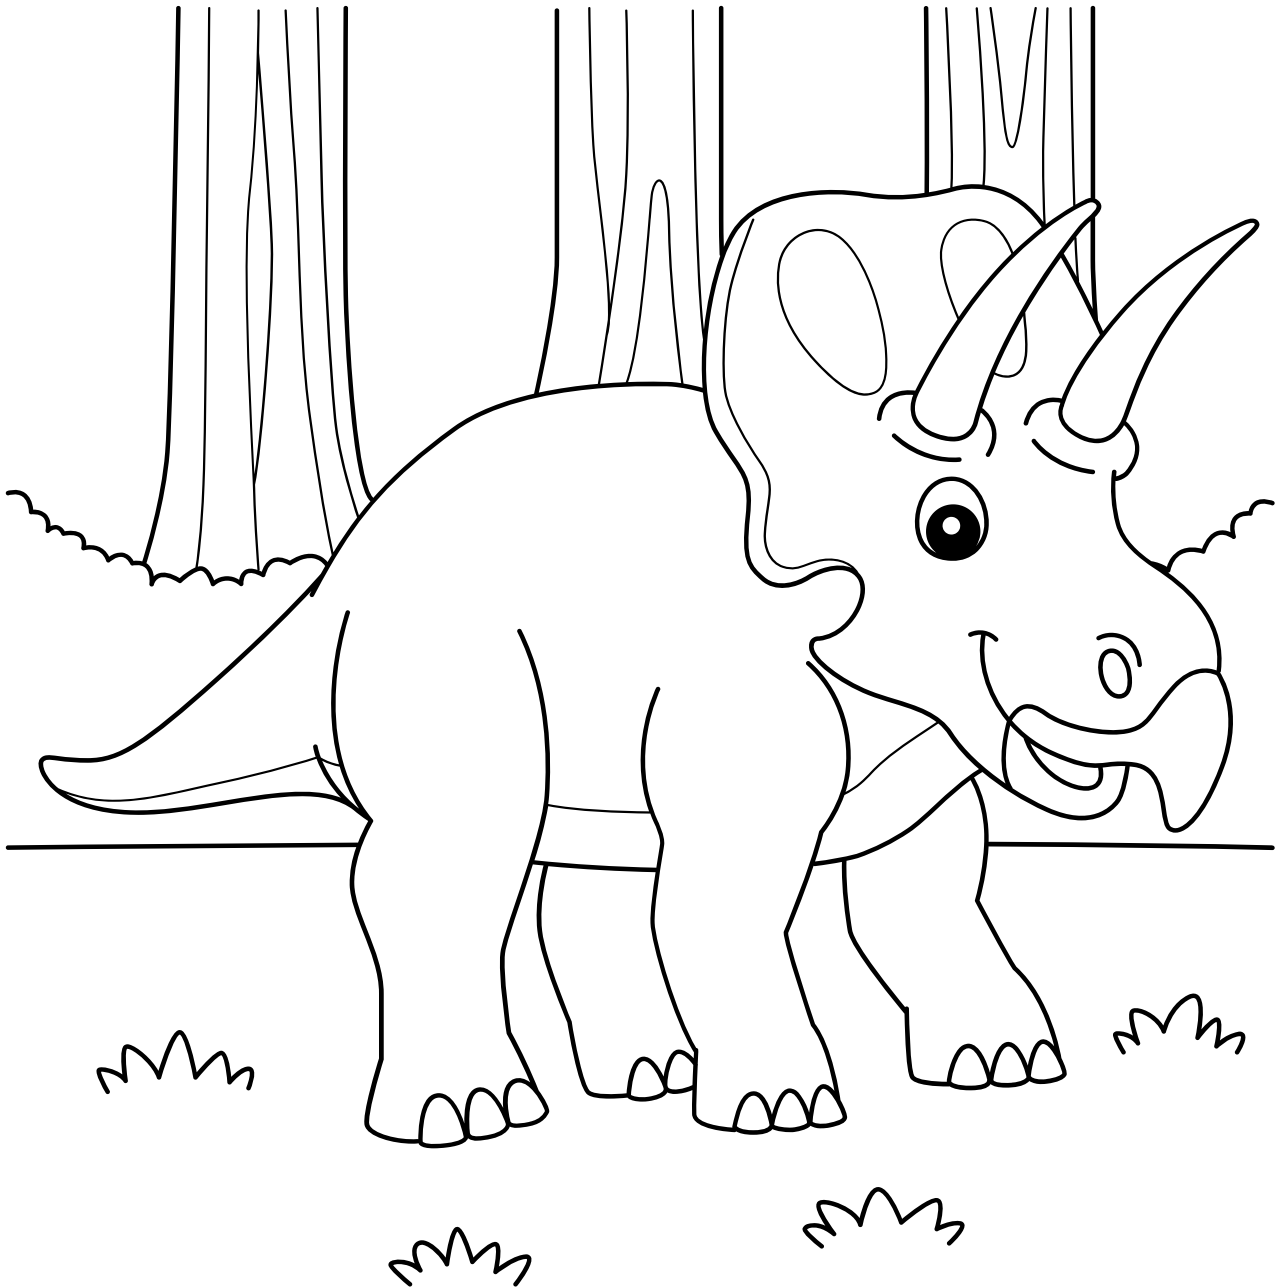

**Iguanodon avea cioc fără
dinti.**

Neuquensaurus

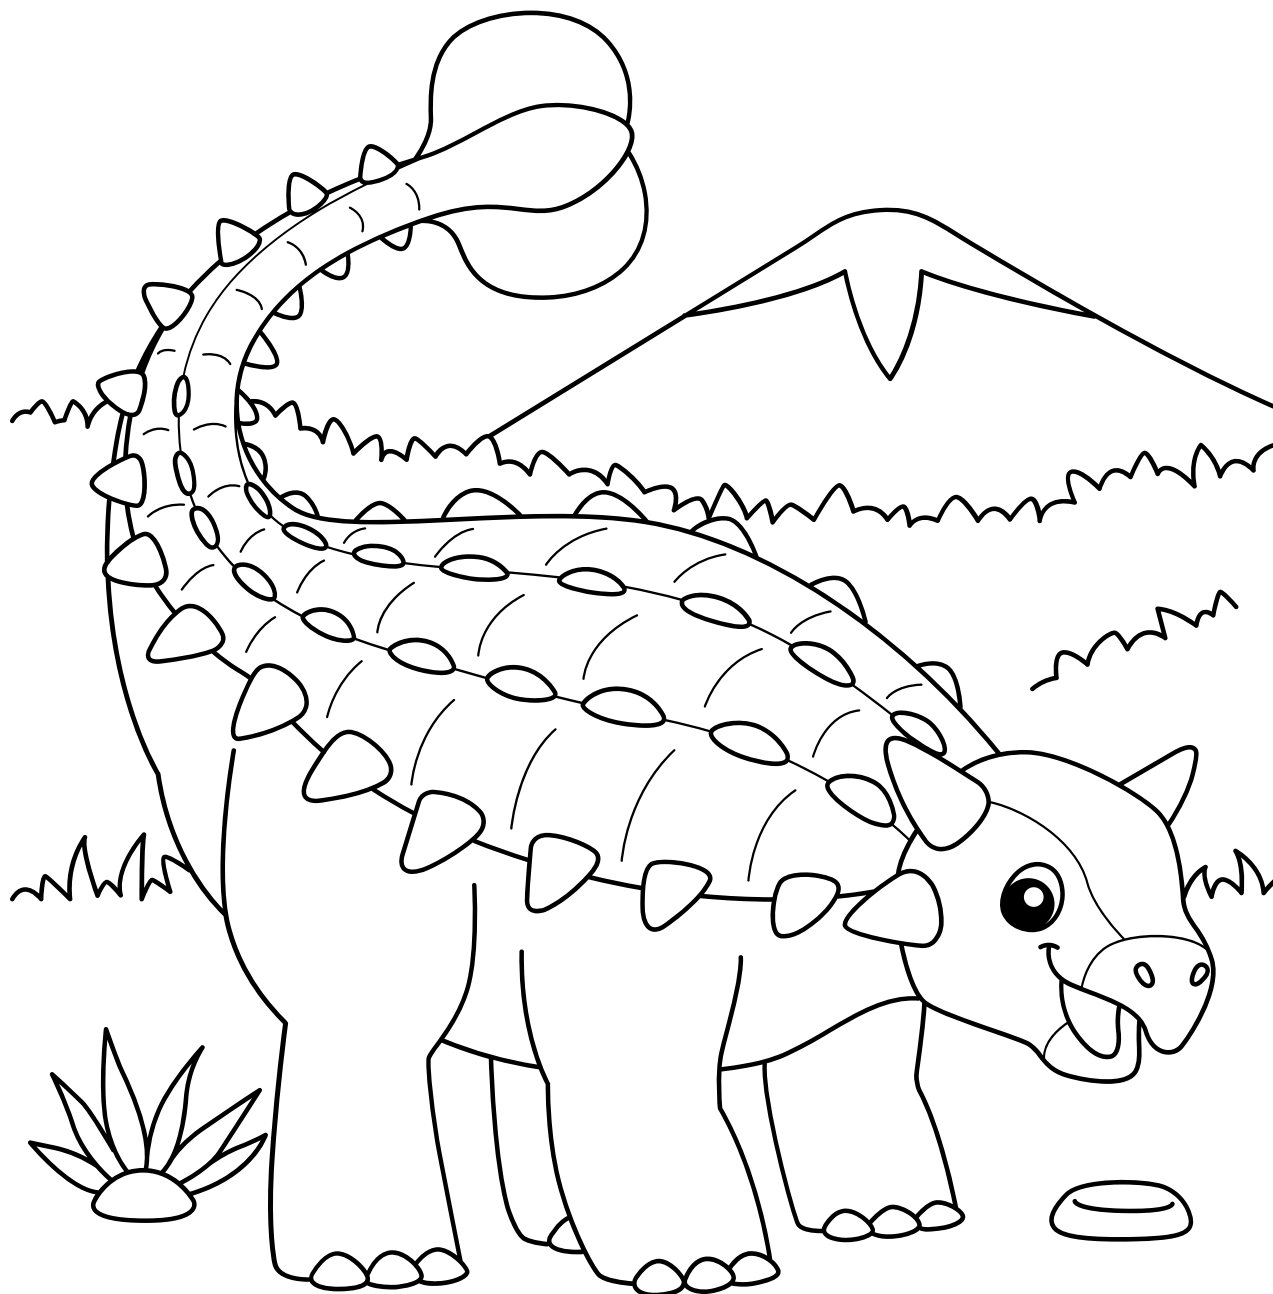

**Neuquensaurus se mișca folosind
toate cele patru picioare.**

Zuniceratops

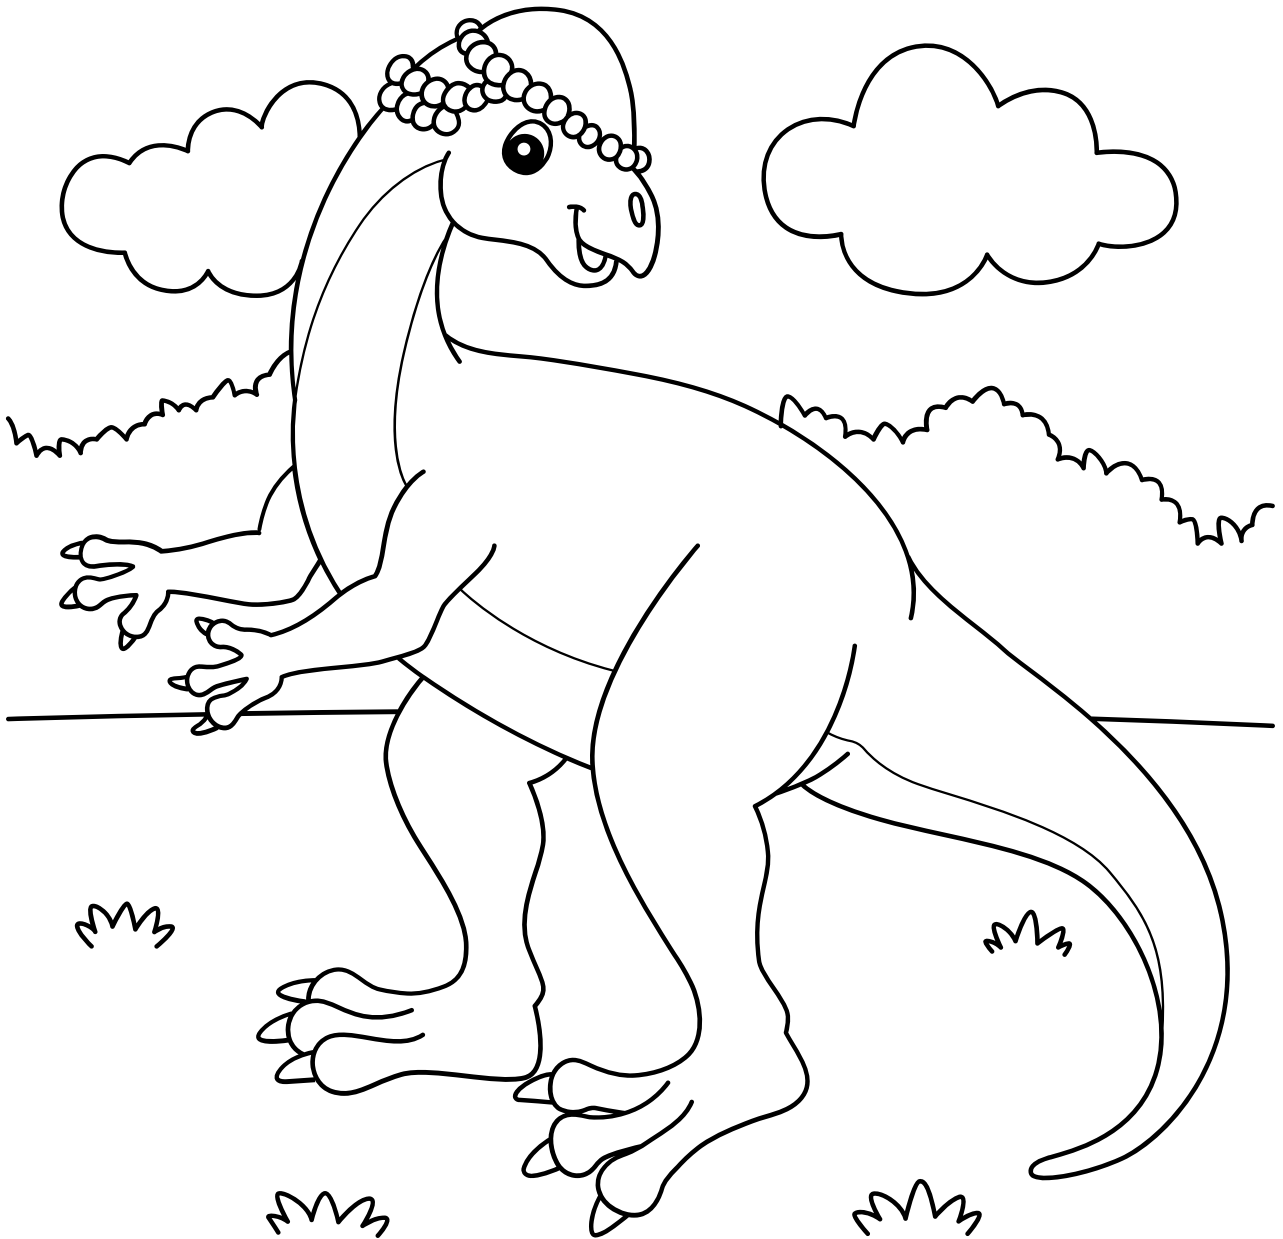

**Zuniceratops era un mic
ierbivor.**

Anchilozaur

**Anchilozaurul avea un creier
foarte mic.**

Wannanosaurus

**Wannanosaurus a trăit în
urmă cu aproximativ 70 de
milioane de ani.**
